Cragle, 2023-10-06 Utilizing a crusading ethos from 772 to 804 AD Charlemagne King of the Franks waged war against the continental Saxons to integrate them within the growing Frankish Empire and facilitate their conversion to Christianity While substantial research has been produced concerning various components of Carolingian history this work offers a unique examination of Charlemagne's

Saxon Wars as a case study for understanding methods of conversion used in the Christianization of Europe as well as their significance for subsequent conversion strategies employed around the globe. *Converting the Saxons* builds on prior scholarly research is grounded in primary sources and is contextualized with a robust historical introduction. Throughout the text particular emphasis is given to Christian encounters with paganism and the way paganism was interpreted, confronted and transformed. Within those encounters we observe myriad forces of coercion and incentivization used in societal religious conversion demonstrating the need for a serious reconsideration of the standard narratives surrounding Christian missions. This book provides a scholarly and accessible resource for students and researchers interested in transhistorical methods of conversion.

Sinister and Righteous C. Riley Augé, 2024-12-01 In recent years archaeologists have begun to consider the potential for left and right positioning of elements in the material record to reveal cultural ideas about gender identity, authority, worldviews and belief systems. This research demonstrates the ubiquitous but often overlooked occurrence of material culture meaningfully arranged according to deeply entrenched left and right concepts and is the first to bring together and expand upon these cultural ideologies. Archaeological examples provide archaeologists with insight and guidance for recording, analyzing and interpreting any left and right elements or associations present in the imagery, features, artifacts and landscapes of their study sites.

TIME Rick Perez, 2010-05-24 This book divides *TIME* into three main units. The first unit will be time in general. The second unit will be time as we know it on clocks. The third unit will be dedicated to calendars. The purpose in writing this book is to make the reader THINK. Should we change our current clock and/or calendar to make them better? For example, why are there 60 minutes in an hour or why do we have 28, 29, 30 or 31 days in a month? In the first unit Rick gives us a brief introduction and some historical theories as to how and why man started keeping track of time. In one of the sections in this unit Rick tries to show how the ages in the Bible's genealogy from Adam to Noah are more realistic by using lunar years instead of solar. He concludes this unit with his version of time zones. The second unit is dedicated to clocks and other hour measuring devices. Sundials, water clocks, candles, mechanical and atomic clocks are some of the types mentioned. The reader is given information to explain why the day was divided into 24 hours and why the hour was divided into 60 minutes. Rick concludes this unit by proposing a solar day of 100 shorter hours. Finally, the third unit is devoted to the solar year, giving details of some of the early calendars like the Egyptian, Babylonian, Roman, Gregorian, etc. Here is where we see the mark that the early lunar or luni-solar calendars have left on our current calendar. In this unit Rick gives us his calendar proposal featuring a ten-day week. But the most spectacular section is the section titled *The Dates and Times of Jesus's Birth and Death*. He uses scientific data, historical information and scriptural references to deduce the exact times and dates of Jesus's birth and death.
