Advances in Child Abuse Prevention

Knowledge Deborah Daro, Anne Cohn Donnelly, Lee Ann Huang, Byron J. Powell, 2015-06-05 This book addresses new avenues in child abuse prevention research that will expand our capacity to protect children These new avenues result from the emergence of new research methods made possible through technologic advances an understanding of the benefits of cross disciplinary research and learning and the entrance of many young scholars in the field The book explores what these avenues produce in terms of clarifying the complex problems that continue to limit our progress in addressing child maltreatment and promoting optimal child development Specifically the book showcases individual contributions from emerging scholars and show how these scholars use the frameworks and advanced methods to shape their work apply their findings and define their learning communities The book highlights the benefits of creating explicit and extended opportunities for researchers to network across disciplines and areas of interest The primary authors are young scholars from universities across the U S who have worked together as Fellows of the Doris Duke Fellowships for the Promotion of Child Well Being seeking innovations to prevent child abuse Through this program the Fellows have engaged in a robust self generating learning network designed to create the type of ongoing professional linkages and decision making style that fosters an interdisciplinary and team planning approach to research design and policy formation

Monumentalising Life

in the Neolithic Anne Birgitte Gebaer, Lasse Sørensen, Anne Teather, António Carlos Valera, 2020-09-30 One of the principal characteristics of the European Neolithic is the development of monumentality in association with innovations in material culture and changes in subsistence from hunting and gathering to farming and pastoralism The papers in this volume discuss the latest insights into why monumental architecture became an integral part of early farming societies in Europe and beyond One of the topics is how we define monuments and how our arguments and recent research on temporality impacts on our interpretation of the Neolithic period Different interpretations of G bekli Tepe are examples of this discussion as well as our understanding of special landmarks such as flint mines The latest evidence on the economic and paleoenvironmental context carbon 14 dates as well as analytical methods are employed in illuminating the emergence of monumentalism in Neolithic Europe Studies are taking place on a macro and micro scale in areas as diverse as Great Britain Denmark Sweden Poland Germany the Dutch wetlands Portugal and Malta involving a range of monuments from long barrows and megalithic tombs to roundels and enclosures Transformation from a natural to a built environment by monumentalizing part of the

landscape is discussed as well as changes in megalithic architecture in relation to shifts in the social structure. An ethnographic study of megaliths in Nagaland discusses monument building as an act of social construction. Other studies look into the role of monuments as expressions of cosmology and active loci of ceremonial performances. Also, a couple of papers analyse the social processes in the transformation of society in the aftermath of the initial boom in monument construction and the related changes in subsistence and social structure in northern Europe. The aim of the publication is to explore different theories about the relationship between monumentality and the Neolithic way of life through these studies encompassing a wide range of types of monuments over vast areas of Europe and beyond. **The Soul of a University**

Chris Brink, 2018-07-01. What is the role of a university in society? In this innovative book, Chris Brink offers the timely reminder that it should have social purpose as well as achieve academic excellence. The current obsession with rankings and league tables has perpetuated inequality and is preventing social mobility. This book shows how universities can and should respond to societal challenges and promote positive social change. [International Conference on Reliable Systems Engineering \(ICoRSE\) - 2023](#) Daniela Doina Ciobață, 2023-09-04. This book comprises state-of-the-art research results in the field of mechatronics and other closely related areas and that will be presented on occasion of the third International Conference of Reliable Systems Engineering ICoRSE 2023 that will take place in Bucharest, Romania, between 07-08 September 2023. The first two ICoRSE editions brought together professors, Ph.D. students and researchers in Europe, North America and Asia in countries such as England, Albania, Austria, Bulgaria, Canada, Czech Republic, Germany, France, Italy, Portugal, Turkey, Ukraine, Uzbekistan and Vietnam. In this year's edition of the conference, we have benefitted from the inclusion in the scientific committee of the conference of professors in all of these countries and we cover a wide variety of topics such as theoretical and applied mechanics, cyber-physical systems, robotics, smart bio-medical and bio-mechatronic systems, new and intelligent materials and structures, modelling and simulation in mechanics and mechatronics, smart mechatronic production and control systems, optics control systems, big data modelling, micro and nanotechnology, automation, manufacturing optimization and other. Since the book's chapters represent contributions of scholars who work in both state-funded institutions and in the business environment, they reflect a clear picture of the novelties attained in the leading edge sciences that are in the scope of the conference. It is our belief that the book is useful to both students and researchers in all areas of engineering who will each find at least one topic worthy of their interest in this work.
