Anatomy Models For Young Kids:

International Anatomical Education Iain D. Keenan, Isabel Stabile, Asha Venkatesh, 2025-08-10 Anatomy is intrinsically a three dimensional and visual discipline Anatomical education is therefore primarily delivered using physical and digital three dimensional visual approaches to support student understanding of anatomy including human body donor specimens and technology enhanced learning resources The Trans European Pedagogic Anatomy Research Group TEPARG was founded in 2003 to promote scholarly research informed and evidence based approaches to the design and implementation of anatomical education TEPARG brings together enthusiastic anatomy teachers and pedagogic researchers from across Europe and beyond to share good practice and create new projects in support of anatomical education The work presented in this volume demonstrates careful consideration by the authors of several key areas within the current complex landscape of international anatomical education This volume is presented in two subthemes with the first section concerning broad considerations of modern anatomy curricula in England Scotland Wales and Austria and the second section involving discussion of pedagogic innovations for the delivery of anatomical education to learners and to the wider public in Italy Spain Australia and the United Kingdom The work presented in this volume will have implications for anatomical educators and pedagogic researchers in the anatomical sciences who are seeking to develop their own anatomy curricula and to implement effective evidence based and research informed visualization strategies and innovations into their teaching

Environmental Health Perspectives ,1993 *Positive Psychology in the Elementary School Classroom* Patty O'Grady, 2013-03-11 Use the neuroscience of emotional learning to transform your teaching How can the latest breakthroughs in the neuroscience of emotional learning transform the classroom How can teachers use the principles and practices of positive psychology to ensure optimal 21st century learning experiences for all children Patty O Grady answers those questions Positive Psychology in the Elementary School Classroom presents the basics of positive psychology to educators and provides interactive resources to enrich teachers proficiency when using positive psychology in the classroom O Grady underlines the importance of teaching the whole child encouraging social awareness and positive relationships fostering self motivation and emphasizing social and emotional learning Through the use of positive psychology in the classroom children can learn to be more emotionally aware of their own and others feelings use their strengths to engage academically and socially pursue meaningful lives and accomplish their personal goals The book begins with Martin Seligman s positive psychology principles and continues into an overview of affective learning including its philosophical and psychological roots from finding the golden mean of emotional regulation to finding a child s potencies and golden self O Grady connects the core concepts of educational neuroscience to the principles of positive psychology explaining how feelings permeate the brain affecting children s thoughts and actions how insular neurons make us feel empathy and help us learn by observation and how the frontal cortex is the hall monitor of the brain The book is full of practical examples and

interactive resources that invite every educator to create a positive psychology classroom where children can flourish and reach their full potential

Evidence-Based Outreach/Service-Learning to Improve Health-Related Self-Efficacy through STEMM Education Jonathan J. Wisco, Carolina Restini, Peter J. Vollbrecht, Tracey Weiler, Kirsten A. Porter-Stransky, 2025-10-13 Outreach and service learning to elementary and secondary schools and community organizations that serve under represented groups URG and under represented minority URM demographics has long been a focus of pre clinical and clinical health professions education institutions to improve individual and health related self efficacy When health pre professional and professional students teach correct science technology engineering math and medicine STEMM principles to youth they help to improve the health related self efficacy and cultural competency of individuals and the community Service learning is an extension of outreach efforts defined broadly by different accreditation councils as educational experiences in which students purposefully prepare and provide service to the community followed by a reflection on the experience Together outreach and service learning are excellent opportunities for professional pathway students to inspire the next generation of elementary and secondary school children to develop evidence based health related self efficacy and an interest in STEMM careers
