Learning Concepts divide each chapter into easily absorbed subunits of information making learning more achievable. Since students in a one semester course may have little experience with biological and chemical concepts giving them tools such as concept statements, concept check questions and a concept block study sheet at the end of each chapter help them relate complex ideas to simple everyday events. The book also has a companion Student Notebook and Study Guide available separately that reinvents the traditional study guide by giving students a tool to help grasp information in class and then reinforce learning outside of class. With additional powerful options like PrepU and the ADAM Interactive Anatomy Online Student Lab Activity Guide, students have access to learning activities to help them study, understand and retain critical course information. **The Human Body** Bruce D.
