It gives clear descriptions and illustrations of the majority of background lesions likely to be encountered. Many of the lesions covered are unusual and can be mistaken for treatment related findings in preclinical toxicity studies. The Atlas has been prepared with contributions from experienced toxicological pathologists who are specialists in each of the laboratory animal species covered and who have published extensively in these areas. Over 600 high definition top quality color photographs of background lesions found in rats, mice, dogs, minipigs, non human primates, hamsters, guinea pigs and rabbits. A separate chapter on lesions in the reproductive systems of all laboratory animals written by Dr Dianne Creasy, a world expert on testicular lesions in laboratory animals. A chapter on common artifacts that may be observed in histological glass slides. Extensive references to each lesion described. Aging lesions encountered in all laboratory animal species particularly in rats and mice which are used for
