Anatomy Posters For Med Students:

Science Patricia Fara, 2009 *Science A Four Thousand Year History* rewrites science's past. Instead of focussing on difficult experiments and abstract theories, Patricia Fara shows how science has always belonged to the practical world of war, politics and business. Rather than glorifying scientists as idealized heroes, she tells true stories about real people, men and some women who needed to earn their living, who made mistakes and who trampled down their rivals in their quest for success. Fara sweeps through the centuries from ancient Babylon right up to the latest hi-tech experiments in genetics and particle physics, illuminating the financial interests, imperial ambitions and publishing enterprises that have made science the powerful global phenomenon that it is today. She also ranges internationally, illustrating the importance of scientific projects based around the world from China to the Islamic empire, as well as the more familiar tale of science in Europe from Copernicus to Charles Darwin and beyond. Above all, this four thousand year history challenges scientific supremacy, arguing controversially that science is successful not because it is always right, but because people have said that it is right.

Official Gazette Philippines, 2007 Pediatrician Soldier Charles L. Garbarino, 2008-12. *Pediatrician Soldier* tells COL Dr Garbarino's amazing true story of how he left the safety and security of a successful medical practice to enter a combat zone. Experience a different side of war, the human side, with this deeply emotional first-hand account of this pediatrician's overseas deployment for Operation Iraqi Freedom. View the war from the perspective of someone who is there to take care of our soldiers. *Pediatrician Soldier* is an easy-to-read collection of essays based on Dr Garbarino's diaries and e-mails while in Iraq and Kuwait. Some of the stories are humorous, some are inspiring. Throughout, Dr Garbarino provides a blunt assessment of what has worked, what has failed, to meet the needs of our soldiers. Compassionate and powerful, this book reveals this children's physician's incredible dedication and devotion to caring for our troops, whom he describes as just big kids, using humor, empathy and love. In addition, there are essays from others who have been affected by the war, who have served in Iraq and those from home. Each offers the author's own experiences and perspective on the Iraq war. Get to know two soldiers: one fallen, Captain John J. McKenna, killed by sniper fire while leading his soldiers during a mission; and one forever traumatized, Sgt Daniel Tallouzi, who, because of a small piece of shrapnel from a mortar attack, returned in an eyes-open coma. Feel for those family members living each day, never knowing if their loved ones will return in a box, disabled or forever changed. COL Garbarino, the soldier, has seen how war's devastation has brought death and destruction to all in its path. His book allows insight into his two OIF tours as seen through his eyes, written with deep passion and revealing a human face to war. Dr Charlie, the pediatrician, is looking into the future to see if there will be a world for tomorrow's children. **Medical**
