Ehlers-Danlos/Hypermobility Syndromes and Other Connective Tissue Disorders Nicholas L. DePace, Stephen Soloway, Michael Yayac, Joe Colombo, 2025-09-26 This book covers Ehlers Danlos and hypermobility syndromes with an emphasis on treatment of the parasympathetic and sympathetic P S nervous system dysfunctions Unfortunately most EDS HSD patients have been misdiagnosed and misunderstood by providers EDS HSD is a multisystem multifaceted disorder that is poorly understood The P S manifestations and treatments are also poorly understood throughout the healthcare community To this end the authors wish to teach providers and patients alike to reduce the life long suffering from both the disorder and the marginalization There are two aspects of teaching that are required and provided by this book improved understanding of EDS HSD and improved understanding of P S autonomic dysfunction and treatment For example with the autonomic nervous system more treatment or therapy is never better Relief of P S dysfunction must be low and slow to prevent causing more symptoms from higher doses of medication or polypharmacy To this end stress often sets patients back and both providers

and patients alike must have proper expectations set for successfully improving patient outcomes quality of life and productivity The book starts with an introduction to and history of the disorder Chapter II provides a review of the genetics of collagen the source of the disorders Chapters III through IX detail the various forms of EDS HSD and goes into more detail on the more common and more well known variants of EDS HSD Chapter X discusses structural cardiovascular and pulmonary dysfunction associated with EDS HSD Chapter XI discusses structural gastrointestinal and urogenital dysfunction associated with EDS HSD The book ends with Chapter XII which details the involvement of the P S nervous systems and how to treat which also has general application to other chronic disorders This is an ideal guide for rheumatologists and primary care physicians treating patients with Ehlers Danlos and hypermobility syndromes and patients and their loved ones in understanding their disease and disorders and the associated treatments and therapies

LiPuma,Joseph P. DeMarco,2019-03-27 This vitally important book attempts to move beyond the current death denying culture The use of euphemistic and defiant phrases when

dealing with terminal disease such as She lost her battle with cancer was more appropriate when medical doctors could do little to prolong life But treatments and technologies have significantly changed Now life prolonging interventions have outpaced our willingness to use medical intervention to secure patient control over death and dying We now face a new question When is it morally appropriate for medical intervention to hasten the dying process LiPuma and DeMarco answer by endorsing expanded options for dying patients Unwanted aggressive treatment regimens and protocols which reject hastening death should be replaced by a patient's moral right in carefully defined circumstances to hasten death by means of medical intervention Expanded options range from patient directed continuous sedation without hydration to physician assisted suicide for those with progressive degenerative disorders such as Alzheimer's The authors overriding goal is to humanize the dying process by expanding patient centered autonomous control
