Ancient China Research Project 4th Grade:

Chinese Education Models in a Global Age Chuing Prudence Chou, Jonathan Spangler, 2016-04-06 China's rise and an increasing emphasis on international education benchmarking and a global recognition of East Asian countries' success in this regard have brought the issue of Chinese education to the forefront of public consciousness. In particular, the concept of a Chinese education model is one that has sparked debate and quickly become a major focus of education research around the world, especially in light of regional achievements vis-à-vis university rankings, bibliometric indices, the Programme for International Student Assessment (PISA), Trends in International Mathematics and Science Study (TIMSS), and other such benchmarks. *Chinese Education Models in a Global Age* tackles this controversial issue head-on by synthesizing a diversity of analyses from a world-class team of twenty-seven authors. It reveals that Chinese education models, which are present in many different geographic and institutional contexts, have an important influence on social and institutional norms as well as individual belief systems and behaviors in China and beyond. The first of its kind, this edited volume establishes a foundation for future research while providing a nuanced and tightly integrated compilation of differing perspectives on the role and impact of Chinese education models worldwide. It is essential reading for all scholars, policymakers, students, parents, and educators interested in the rising demographic and economic influence of people of Chinese descent on education around the world. **Resources in Education**, 2001 *Chinese Research Perspectives on Educational Development, Vol. 6* Dongping

Yang, Min Yang, Shengli Huang, 2022-03-21 This volume includes English translations of articles selected from the Blue Book of Chinese Education 2017, 2018, and 2019. It reviews China's education development from 2016 to 2018. A total of 16 chapters in this volume cover a wide variety of topics on education in China, including equity, quality, governance, access, law, and regulations on privately run schools, basic education, higher education, special education, among others. The contributors include both scholars as well as practitioners who have first-hand experience and insight on China's education. The volume presents to the reader articles in different formats such as academic discussions, survey reports, and case studies.
