

APES Exam Study Guide Review

Unit 1: The Living World: Ecosystems

1. Explain how the availability of resources influences species interactions.

2. Describe the global distribution and principal environmental aspects of terrestrial biomes.

- Certain availability of resources can result in **competition** between species, especially when the resource is **limited**. Both species are negatively affected. EX: Plant species competing for groundwater.
- **Resource Partitioning** - Where different species use different amounts, areas, or use the resource at a different time to reduce competition. EX: Bird species using different parts of a tree depending on their diet.
- **Symbiosis** - Long-term interactions of two species inside of an ecosystem. There are multiple organism interactions such as: **Mutualism**, **Commensalism**, **Parasitism**, and **Predation** (already mentioned).
- **Mutualism** - **BOTH** organisms benefit from the interaction. EX: Bees and the plants they pollinate.
- **Predator-Prey Relationship (Predation)** - the predator consumes the prey. Only the predator benefits. EX: Lions eating zebras.
- **Commensalism** - Only **ONE** organism benefits, the other is neutrally affected. EX: Birds nesting in trees.
- A **biome** is an area that contains a consistent yearly average of precipitation and temperature, containing organisms that are adapted to living in those specific climate conditions.
- **Terrestrial biomes includes:** Taiga, temperate rainforests, temperate seasonal forests, tropical rainforests, shrubland, temperate grassland, savanna, desert, and tundra.
