2025 held on October 8-10, 2025 in Karpacz, Poland, cover a wide range of topics such as theoretical advances in hydraulics, pneumatics, and control fluid dynamics; diagnostics and simulation; and energy aspects and applications. Further topics include design and performance aspects of pumps and rotary systems; sealing elements and connections; and new materials and their properties in improving the efficiency of hydraulic components. High Speed Pneumatic Theory and Technology Volume II Yaobao Yin, 2020-01-30. This book highlights the latest developments and the author's own research achievements in high speed pneumatic control theory and applied technology. Chiefly focusing on the control system and energy system, it presents the basic theory and pioneering technologies for aerospace and aviation while also addressing e.g. pneumatic servo control theory, pneumatic nonlinear mechanisms, aerothermodynamics, pneumatic servo mechanisms, and sample applications of high temperature and high speed gas turbine systems in aerospace aviation and major equipment. Hydraulics of Pipeline Systems Bruce E. Larock, Roland W. Jeppson, Gary Z. Watters, 1999-09-28. The first of its kind, this modern comprehensive text covers both analysis and design of piping systems. The authors begin with a review of basic hydraulic principles with emphasis on their use in pumped pipelines, manifolds, and the analysis and design of large pipe networks. After the reader obtains an understanding of how these principles are implemented in computer solutions for steady state problems, the focus then turns to unsteady hydraulics. These are covered at three levels. **Technical Manual** United States Department of the Army, 1961. *Hydraulics and Pneumatics Controls* Shanmuga Sundaram, 2006. The conference series was initiated at Tsinghua University in 1991 and has since become the premier international HVAC conference initiated in China, playing a significant part in the development of HVAC and indoor environmental research and industry around the world. This international conference provided an exclusive opportunity for policy makers, designers, researchers, engineers, and managers to share their experience. Considering the recent attention on building energy consumption and indoor environments, ISHVAC2013 provided a global platform for discussing recent research on and developments in different aspects of HVAC systems and components with a focus on building energy consumption, energy efficiency, and indoor environments. These categories span a broad range of topics and the proceedings provide readers with a good general overview of recent advances in different aspects of HVAC systems and related research. As such, they offer a unique resource for further research and a valuable source of information for those interested in the subject. The proceedings are intended for researchers, engineers, and graduate students in the fields of
