THE MONACELLI PRESS

Albert Speer Architecture Leon Krier

George Baird

Albert Speer Architecture Leon Krier:

Albert Speer Albert Speer, Léon Krier, Lars Olof Larsson, 1985 **From Autos to Architecture** David Gartman, 2012-04-17 One of the most interesting questions in architectural history is why modern architecture emerged from the war ravaged regions of central Europe and not the United States whose techniques of mass production and mechanical products so inspired the first generation of modern architects like Le Corbusier Mies van der Rohe and Walter Gropius In *From Autos to Architecture* sociologist David Gartman offers a critical social history that shows how Fordist mass production and industrial architecture in America influenced European designers to an extent previously not understood Drawing on Marxist economics the Frankfurt School and French sociologist Pierre Bourdieu *From Autos to Architecture* deftly illustrates the different class structures and struggles of America and Europe Examining architecture in the context of social conflicts *From Autos to Architecture* offers a critical alternative to standard architectural histories focused on aesthetics alone

Architecture as Cultural and Political Discourse Daniel Grincer, 2016-02-26 This book is concerned with cultural and political discourses that affect the production of architecture It examines how these discursive mechanisms and technologies combine to normalise and aestheticise everyday practices It queries the means by which buildings are appropriated to give shape and form to political aspirations and values Architecture is not overtly political It does not coerce people to behave in certain ways However architecture is constructed within the same rules and practices whereby people and communities self govern and regulate themselves to think and act in certain ways This book seeks to examine these rules through various case studies including the reconstructed Notre Dame Cathedral the Nazi era Munich Königsplatz Auschwitz concentration camp and the Prora resort Sydney's suburban race riots and the Australian Immigration Detention Centre on Christmas Island

Berlin - Washington, 1800-2000 Andreas Daum, Christof Mauch, 2005-12-26 Publisher description **Hitler's Engineers** Blaine Taylor, 2020-01-10 An intriguing account of two of Nazi Germany's top architects and how their work prolonged the war for months includes hundreds of photos WWII History A Selection of the Military Book Club While Nazi Germany's temporary ascendancy owed much to military skill the talent of its engineers not only buoyed the regime but allowed it to survive longer than would normally be expected This unique work focusing on Fritz Todt and Albert Speer is based on many previously unpublished photographs and artwork from captured Nazi records Todt was the brilliant builder of the world's first superhighway system the Autobahn and the architect of the German West Wall the Siegfried Line that predated the later Atlantic and East Walls The builder of each of the wartime Führer Headquarters as well as the submarine pens Todt was killed in a still mysterious airplane crash that may well have been a Nazi death plot though he was given a state funeral by Hitler Todt was succeeded as German Minister of Armaments and War Production by the Führer's longtime personal architect Albert Speer who was described by the Allies after the war as having prolonged the conflict by at least a year Called a genius by Hitler Speer designed and built the prewar Nuremberg Nazi Party Congress rally stands and

buildings More importantly amid the constant rain of Allied bombs and the Soviet advances from the East Speer managed to keep the German industrial machine running until the spring of 1945 though it was driven ever further underground He also allocated resources to fortifications and counterattacks like the V missile installations against both West and East in attempts to stave off defeat Convicted as a war criminal at Nuremberg Speer served twenty years at Spandau Prison and remained a Nazi apologist who died in London in 1981 on the anniversary of the German invasion of Poland Together Todt and Speer were the pillars that propped up the Third Reich through the vicissitudes of battlefield fortune With over three hundred photographs this is the first work that examines their role in history s most terrible war Postmodern Urbanism Nan Ellin,1999 A comprehensive guide to the scope of contemporary urban design theory in Europe and the USA The Sociology of Architecture Paul Jones,2011-01-01 Drawing on sociological theories to assist understanding of how political power operates in the cultural sphere The Sociology of Architecture frames the discipline as a field of symbolic and material conflict over social identities This volume contests the notion of architecture as an apolitical endeavor and suggests that major architectural projects can act as tangible expressions of the ultimately contested nature of collective identities thus shedding light on how those with power both legitimate and mark their position in the world **The Space of Appearance** George Baird,1995 George Baird probes into the conceptual lineage and current expressions of postmodernism and the critique of postmodern architecture over the past four decades **The Idea of the Postmodern** Hans Bertens,2003-09-02 Hans Bertens s The Idea of the Postmodern is the first introductory historical overview of postmodernism to succeed in providing a witty and useful guide for today s student An enjoyable and indispensable text *Architectural History Retold* Paul Davies,2015-08-27 How much do you know about Greek architecture Roman Gothic The Renaissance Modernism Perhaps more importantly do you know how these are connected or how one style evolved to become another Or what happened historically during each of these periods Architectural History Retold is your roadmap for your journey through architectural history Offering a fresh take on what the author calls the Great Enlightenment project it traces the grand narrative of western architecture in one concise accessible volume Starting in Ancient Greece and leading up to the present day Paul Davies unconventional engaging style brings the past back to life helping you to think beyond separate components and styles to recognise the bigger picture The author is an academic and journalist with three decades of experience in introducing students to architectural history The book is based on his successful entry level course which has used the same unstuffy approach to break down barriers to understanding and engagement and inspire generations of students

The Enthralling Realm of E-book Books: A Detailed Guide Revealing the Benefits of E-book Books: A Realm of Ease and Flexibility E-book books, with their inherent portability and simplicity of access, have freed readers from the limitations of physical books.
