Bridging the Gap Between Policy and Science in Assessing the Health Status of Marine Ecosystems, 2nd Edition Angel Borja, Michael Elliott, María C. Uyarra, Jacob Carstensen, Marianna Mea, 2017-03-22 Marine management requires approaches which bring together the best research from the natural and social sciences It requires stakeholders to be well informed by science and to work across administrative and geographical boundaries a feature especially important in the inter connected marine environment Marine management must ensure that the natural structure and functioning of ecosystems is maintained to provide ecosystem services Once those marine ecosystem services have been created they deliver societal goods as long as society inputs its skills time money and energy to gather those benefits However if societal goods and benefits are to be limitless society requires appropriate administrative legal and management mechanisms to ensure that the use of such benefits do not impact on environmental quality but instead support its sustainable use

Ecological Law in Practice Geoffrey Garver, 2024-10-21 This book presents a series of ecological law case studies designed to illustrate in concrete real world ways how ecological law would transform law in a range of diverse contexts Ecological law is an emerging and currently mostly theoretical discipline grounded in the need to shift away from anthropocentric legal systems which aim to promote economic growth using strong protections of private property regimes and state sovereignty to ecological approaches which emphasize ecocentrism the primacy of ecological limits and intragenerational intergenerational and interspecies fairness and justice The ecological law case studies presented in this book apply the theoretical principles and concepts of ecological law to diverse real world situations or activities in several countries and contexts Taking up a range of examples from Brazil Canada Germany Mexico Nigeria the United States and

internationally the book demonstrates the concrete relevance of ecological law to contemporary sustainability challenges as it reveals pathways for overcoming real world challenges in the implementation and public acceptance of ecological law This book will appeal to researchers scholars and policy makers working in the area of environmental law and governance as well as others with relevant interests in sociolegal studies human geography political science and environmental studies

Marine Ecosystem Assessment for the Southern Ocean: Meeting the Challenge for Conserving Earth Ecosystems in the Long Term Monica M. C. Muelbert, 2024-12-24 National and international agencies need assessments of change in ecosystems and their drivers in order to sustain natural systems to maintain the delivery of services and to meet the challenge for conserving Earth ecosystems in the long term In marine systems change may arise directly from human activities e g fisheries indirectly from local or global activities cascading effects through food webs from fisheries or changing environments from climate change and or ocean acidification or from naturally varying processes A particular challenge for managers is to identify how dangerous future climate change will be for ecosystems and their services and whether mitigation or adaptation may be needed in advance in order to achieve the conservation requirements For regions of international attention particularly those that have the attention of many management or policy oriented bodies a standardized process is needed to harmonize the scientific information on the status and trends in ecosystems used by the different bodies That process also needs to ensure the information is available in a timely manner For example assessments of change in habitats species and or food webs in the Southern Ocean are currently compiled separately for at least ten different international organizations or processes A Marine Ecosystem Assessment for the Southern Ocean MEASO aims to harmonize that information for policy makers This assessment began with an international conference in April 2018 <http://www.measo2018.aq> where it was agreed to undertake the first MEASO over 2018 2019 with the view to provide the outcomes to relevant bodies such as the Scientific Committee for the Conservation of Antarctic Marine Living Resources soon after

Research and Professional Practice in Specialised Translation Federica Scarpa, 2020-09-18 Specialised translation has received very little attention from academic researchers but in fact accounts for the bulk of professional translation on a global scale and is taught in a growing number of university level translation programmes This book aims to provide three things Firstly it offers a description of what makes the approach to specialised translation distinctive from wider ranging approaches to Translation Studies adopted by translation scholars and applied linguists Secondly unlike the traditional approach to specialised translation this book explores a perspective on specialised translation that is much less focused on terminology and more on the function and reception of specialised translated texts Finally the author outlines a professionally oriented hands on approach to the teaching of specialised translation resulting from many years of teaching it to MA students The book will be of interest to Translation Studies students and scholars as well as professional translators who are interested in the theory on which their activity is based

Global Antisemitism: A Crisis of Modernity Charles Asher Small, 2013-11-28. This volume contains a selection of essays based on papers presented at a conference organized at Yale University and hosted by the Yale Initiative for the Interdisciplinary Study of Antisemitism (YIISA) and the International Association for the Study of Antisemitism (IASA) entitled *Global Antisemitism: A Crisis of Modernity*. The essays are written by scholars from a wide array of disciplines, intellectual backgrounds and perspectives and address the conference's two inter-related areas of focus: global antisemitism and the crisis of modernity currently affecting the core elements of Western society and civilization. Rather than treating antisemitism merely as an historical phenomenon, the authors place it squarely in the contemporary context. As a result, this volume also provides important insights into the ideologies, processes and developments that give rise to prejudice in the contemporary global context. This thought provoking collection will be of interest to students and scholars of antisemitism and discrimination as well as to scholars and readers from other fields.

Handbook of Venoms and Toxins of Reptiles Stephen P. Mackessy, 2021-05-24. A decade after publication of the first edition, *Handbook of Venoms and Toxins of Reptiles* responds to extensive changes in the field of toxinology to endure as the most comprehensive review of reptile venoms on the market. The six sections of this new edition, which has nearly doubled in size, complement the original handbook by presenting current information from many of the leading researchers and physicians in toxinology, with topics ranging from functional morphology, evolution and ecology to crystallography, omics technologies, drug discovery and more. With the recent recognition by the World Health Organization of snakebite as a neglected tropical disease, the section on snakebite has been expanded and includes several chapters dealing with the problem broadly and with new technologies and the promises these new approaches may hold to counter the deleterious effects of envenomation. This greatly expanded handbook offers a unique resource for biologists, biochemists, toxicologists, physicians, clinicians and epidemiologists as well as informed laypersons.
