Ovarian Aging: Pathophysiology and Recent Development of Maintaining Ovarian Reserve, volume III Antonio Simone Laganà, Akira Iwase, Osamu Hiraike, 2024-08-16 Age related fertility decline is a striking phenomenon for women and there is an increasing tendency for later marriage and the postponement of childbearing in industrial countries Many epidemiological observations also point out that almost one tenth of reproductive aged women require infertility treatment in these countries Although the uterus is somewhat affected by ageing the ageing ovary is considered a major but inevitable phenomenon Consequently preserving future fecundity is generally understood as preserving ovarian function this is becoming a major concern for physicians specialized in reproductive medicine Several chemicals have proved to improve or maintain the ovarian follicular pool though the efficacy is still limited

Opening Up: Capital Flows and Financial Sector Dynamics in Low-Income Developing Countries Sebastian Horn, Mr. Futoshi Narita, 2021-09-24 Over the past two decades many low income developing countries have substantially increased openness towards external financing and have received large capital inflows Using bank level micro data this paper finds that capital inflows have been associated with financial deepening through increases in bank loans deposits and wholesale funding Domestic banks increase loans more than foreign banks There are only modest signs of a build up in financial vulnerabilities Causality is examined through an instrumental variable approach and an augmented inverse probability weighting estimator These approaches indicate only limited evidence for global push effects pointing towards the importance of domestic pull factors

Leviathan Joaquin De Torres, 2016-11-10 HELIOS Corporation the nation's most powerful gas and energy conglomerate has done something technologically amazing to continue its strangle hold on the oil market Its engineers have built a vessel that can reach the 1.8 trillion barrels of oil and unlimited natural gas reserves discovered at the base of the Marianas Trench more than six miles below the surface of the Pacific Ocean The deep sea mining submarine Goliath is a monstrous behemoth armed with rock slicing blades stone pulverizing drills and an armor plated crush resistant hull With Goliath mining the oil in this unreachable area of Earth will galvanize HELIOS as the sole owners of the nation's future energy supply But during one of the sub's experimental dives something goes horribly wrong and now Goliath has disappeared in the trench Suddenly the U.S. Pacific Fleet goes on full alert when the nuclear attack sub USS Texas goes missing while pursuing an unknown contact in the waters off Guam Cargo ships tankers and a billionaire's yacht are also reported missing Floating debris and remains show that these vessels were not lost but shredded by something of horrific size and strength something man made Evidence shows that whatever it is it's lurking somewhere in the crushing depths of the trench The Defense Department must now seek the help of Dr Joe Salas an anti military protester and renowned oceanographer whose contempt for the Navy is legendary He designs the heralded Dolphin submersibles capable of

operating deeper and longer than any US Navy submarine in existence Despite years of mutual contempt CINCPACFLT SUBPAC commanders and Salas staff are forced to work together to find out how to find and stop this juggernaut which continues to grind the Pacific Ocean into a bloody graveyard
