Extensive revisions to incorporate a number of important developments in the profession, including emphasis on evidence-based practice regarding examination and treatment of children. More emphasis on clinical decision making by including case studies throughout the book in order to enable students to understand and work through the process of patient examination. Additional coverage on the development of body systems, including musculoskeletal, neurological, and neuromuscular, cardiac, and pulmonary. This conforms to the APTA's Guide to Physical Therapy Practice. Boxes regarding the nutritional needs of children with the diseases and disorders. Improved design and art program including many new illustrations and visual information displays.

The Infant Motor Profile Mijna Hadders-Algra, Kirsten R.

Heineman, 2021-03-03. The Infant Motor Profile is a practical manual on a new evidence-based method to assess infant motor behaviour. Not only looking at what milestones the infant has reached but also paying attention to the quality of motor behaviour: how the infant moves. This text provides professionals involved in the care of infants at risk of developmental disorders with information on five domains of motor behaviour: variation, adaptability, symmetry, fluency, and performance. Backed up by extensive up-to-date research, it includes percentile curves so that professionals can easily interpret the infant's scores. The profile created from the assessment informs about the infant's current condition and their risk of developmental disorders, as well as providing suggestions for early intervention tailored to the strengths and limitations of the infant. Used over time, it can be an excellent instrument to monitor the infant's developmental progress. Illustrated with numerous figures and accompanied by a website hosting over 100 video clips, this text is an essential read for professionals in developmental paediatrics, including paediatric physiotherapists, occupational therapists, developmental paediatricians, neuropaediatricians, and paediatric psychiatrists.
