

Student's Solutions to the Exercises

Chapter 1

1

Obviously the scope here is almost endless. Here are three interesting definitions from the USA which students are not very likely to come across (extracted from A.R. Belkaoui (1992) *Accounting Theory*, 3rd edn, Academic Press, London). The Committee on Terminology of the American Institute of Certified Public Accounting defined accounting as follows:

*Accounting is the art of recording, classifying, and summarizing in a significant manner and in terms of money, transactions and events which are, in part at least, of a financial character, and interpreting the results thereof.*¹

The scope of accounting from this definition appears limited. A broader perspective was offered, by the following definition of accounting as:

The process of identifying, measuring, and communicating economic information to permit informed judgements and decisions by users of the information.²

More recently, accounting has been defined with reference to the concept of quantitative information:

*Accounting is a service activity. Its function is to provide quantitative information, primarily financial in nature about economic entities that is intended to be useful in making economic decisions, in making resolved choices among alternative courses of action.*³

¹ 'Review and resume', *Accounting Terminology Bulletin* No.1, American Institute of Certified Public Accounts, New York, 1953, paragraph 5.

² American Accounting Association, *A Statement of Basic Accounting Theory*, American Accounting Association, Evanston, IL, 1966, p.1.

³ *Financial statements of business enterprises*, American Institute of Certified Public Accountants, New York, 1970, paragraph 40.
