

Analog Communication Interview Questions and Answers

Introduction

Analog Communication is a data transmitting technique in which information signal is transmitted in analog nature. This

always utilizes continuous signals to transmit data which may obtained from audio, image, video etc. An Analog signal is a

variable signal continuous in both time and amplitude. To produce modulated signal inside the transmitter in Analog

Communication, analog signal modulates the high carrier frequency. Than this modulated signal is transmitted with the

help of antenna. All AM, FM audio transmission and T.V. transmission are the most preferable examples of analog

communication. Analog communication is very important topic for the students preparing for GATE Exam(Electronics)

Following questions will help to learn the basics concepts of analog communication.
