Electric and Hybrid Cars Curtis D. Anderson, Judy Anderson, 2010-03-30 This illustrated history chronicles electric and hybrid cars from the late 19th century to today's fuel cell and plug in automobiles. It describes the politics, technology, marketing strategies, and environmental issues that have impacted electric and hybrid cars research and development. The important marketing shift from a woman's car to going green is discussed. Milestone projects and technologies such as early batteries, hydrogen, and bio mass fuel cells, the upsurge of hybrid vehicles, and the various regulations and market forces that have shaped the industry are also covered. **Automotive Fuel and Emissions Control** Ekaling Jain, 2025-01-03

Gibson, 2011-02-28 This book is not highly technical, but some knowledge of elementary chemistry would be helpful. It first presents an overview of energy, which is followed by a discussion of the production, consumption, uses, reserves, costs, advantages, and disadvantages of the four nonrenewable fuels: petroleum, natural gas, coal, and uranium. A similar discussion of the renewable sources of energy: biomass, geothermal, tidal, solar, water, and wind, is then given. Electricity, its uses, and how it is generated, is then examined and is followed by a discussion of how and by whom energy is used. The pollution associated with energy and global warming are then considered, and finally a historic review of energy policy is presented. An appendix on the history and science of energy is also provided for those who would like a general review of science before reading the remainder of the book.

The 4 A's of Marketing Jagdish Sheth, Rajendra Sisodia, 2012-04-23 The authors present a powerful and tested approach that helps managers see a business's every action through the eyes of its customers. This approach is organized around the values that matter most to customers: Acceptability, Affordability, Accessibility, and Awareness. Taken together, these attributes are called the 4A's. The 4A framework derives from a customer value perspective based on the four distinct roles that customers play in the market: seekers, selectors, payers, and users. For a marketing campaign to succeed, it must achieve high marks on all four A's using a blend of marketing and non-marketing resources. The 4A framework helps companies create value for customers by identifying exactly what they want and need, as well as by uncovering new wants.

and needs For example none of us knew we needed an iPad until Apple created it That means not only ensuring that customers are aware of the product but also ensuring that the product is affordable accessible and acceptable to them Throughout this book the authors demonstrate how looking at the world through the 4A lens helps companies avoid marketing myopia an excessive focus on the product as well as managerial myopia an excessive focus on process In fact it is a powerful way to operationalize the marketing concept it enables managers to look at the world through the customer s eyes This ability has become an absolute necessity for success in today s hyper competitive marketplace
