Gendered Citizenship Anupama Roy, 2005 Adopting a historical conceptual approach this book examines the gendering of citizenship It argues that through successive historical periods becoming a citizen has involved a gradual extension of the status to more and more persons and groups in particular women which resulted in a more inclusive and egalitarian structure But the promise of equal membership in the political community masks the exclusionary framework that defines citizenship as found in caste hierarchies gender differences and divides between religious communities based on majority and minority status Engaging with contemporary debates on citizenship that place themselves within the framework of multiculturalism and world citizenship this work asserts the need to redefine the notion of community by focussing on citizenship as a measure of activity and practice and by exposing the subtleties of role definition of women implicit in community norms **Hearings, Reports and Prints of the Joint Committee on Atomic Energy** United States.
