## Quiz Instructions

Please read the Anagene case (provided in the accompanying lecture) before beginning this quiz. There is no time limit for this quiz, but you are only allowed to complete it once. This quiz will be primarily a question of fact, but I encourage you to think carefully about the questions, as it will benefit your learning of the material and your preparation for the in-classroom discussion.

### Question 1

1 point

Many do you think the profit margin for Anagene's cartridges has been fluctuating? Is there anything in the actual numbers out of the cartridges changing, or because of the existing system they are using to calculate the cost?

The actual numbers out of the cartridges have not changed. The company looked at estimated number of cartridges produced and reduced the quantity of the costs per unit. This led to the estimated marginal costs to change. Finally, comparing current to historical the marginal quantity should be calculated production from time.

Unique new case-based approach relating essential theory to clinical practice. Modern, highly designed and illustrated so key information can be seen at a glance.
