Cells are the basic units of structure and function

Characteristics of cells

All cells are eukaryotic and have a nucleus

Cells are specialized for their function

Cells are surrounded by a cell membrane

Cells are connected to each other

Cells are constantly changing

The tissue is the group of cells that work together to perform a function

Types of cells

Epithelial cells: cover the body and line organs

Connective tissue: support and connect other cells

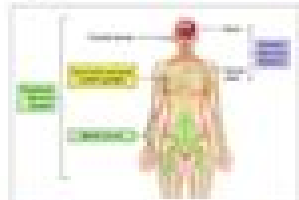

Muscle cells: contract and move the body

Nerve cells: transmit signals

NERVOUS SYSTEM

Functions

- 1. Sensory: receive information from the environment
- 2. Integrative: process information and make decisions
- 3. Motor: control the response to the environment

Structure

The nervous system is composed of the brain and the spinal cord

The brain is the control center of the body

The spinal cord is the communication line between the brain and the rest of the body

The nerves are the branches of the spinal cord that carry signals to and from the rest of the body

The sensory neurons carry signals from the receptors to the brain

The motor neurons carry signals from the brain to the effectors

IMMUNE SYSTEM

The immune system is the body's defense system

Types of immune response

Innate immune response: the first line of defense

Adaptive immune response: the second line of defense

Humoral immune response: the response to antigens in the blood

Cell-mediated immune response: the response to antigens in the cells
