Borba,Monica E. Villarreal,2005-07-25 As we enter into the 21Century the presence of technology particularly techno science in everyday life is overwhelming Institutions in the modern world are affected by this presence Like Janus the ancient Roman god whose double faced head signified his knowledge of

the present and the future education has always been a two faced enterprise The past establishes goals and methods of Education and the other face tries to capture the future and suggests and proposes new directions of thought and new styles of behavior for the generation which in a few years will take over both routines and societal innovation History tells us that this face of Education has always been sensitive to emerging technologies Technologies of communication and information have been particularly influential in new directions of society in particular of education The transition from orality to writing marked a new role for the teacher From the sole repository of accumulated knowledge the teacher became a guide and interpreter of registered knowledge The emergence of hardware in the form of documents and books initiated a companionship between teacher and hardware It is also remarkable how the emergence of writing strengthened individual memory contrary to the concerns of Thamus when Theuth explained to him the discovery of writing The conservative king was afraid that the new invention would implant forgetfulness in the souls of men Topology K. Kuratowski,2014-05-12 Topology Volume I deals with topology and covers topics ranging from operations in logic and set theory to Cartesian products mappings and orderings Cardinal and ordinal numbers are also discussed along with topological metric and complete spaces Great use is made of closure algebra Comprised of three chapters this volume begins with a discussion on general topological spaces as well as their specialized aspects including regular completely regular and normal spaces Fundamental notions such as base subbase cover and continuous mapping are considered together with operations such as the exponential topology and quotient topology The next chapter is devoted to the study of metric spaces starting with more general spaces having the limit as its primitive notion The space is assumed to be metric separable and this includes problems of cardinality and dimension Dimension theory and the theory of Borel sets Baire functions and related topics are also discussed The final chapter is about complete spaces and includes problems of general function theory which can be expressed in topological terms The book includes two appendices one on applications of topology to mathematical logics and another to functional analysis This monograph will be helpful to students and practitioners of algebra and mathematics
