Numerical Regularization for Atmospheric Inverse Problems Adrian Doicu, Thomas Trautmann, Franz Schreier, 2010-07-16 The retrieval problems arising in atmospheric remote sensing belong to the class of the called discrete ill posed problems These problems are unstable under data perturbations and can be solved by numerical regularization methods in which the solution is stabilized by taking additional information into account The goal of this research monograph is to present and analyze numerical algorithms for atmospheric retrieval The book is aimed at physicists and engineers with some background in numerical linear algebra and matrix computations Although there are many practical details in this book for a robust and efficient implementation of all numerical algorithms the reader should consult the literature cited The data model adopted in our analysis is semi stochastic From a practical point of view there are no significant differences between a semi stochastic and a deterministic framework the differences are relevant from a theoretical point of view e g in the convergence and convergence rates analysis After an introductory chapter providing the state of the art in passive atmospheric remote sensing Chapter 2 introduces the concept of ill posedness for linear discrete equations To illustrate the difficulties associated with the solution of discrete ill posed problems we consider the
