Anatomy And Physiology Class Hard:

Lipstick and Autism Lauren Ratcliff, 2023-09-10 Autism is the fastest growing and most common developmental disorder. Imagine the frustration and anxiety over taking your child to a team of medical specialists to be told that they have a lifelong and often debilitating developmental disorder with no cure and limited treatment options. Lauren's parents knew something was different about her from the time she was an infant, but as she entered Kindergarten in the fall of 1986, her differences were very obvious to everyone around her as compared to other children her age. A few months later in early 1987, Lauren's parents took her to see a team of pediatric specialists, and it was then confirmed that she had an incurable and lifelong disorder then known as Pervasive Developmental Disorder, and was later diagnosed with Asperger Syndrome when it was listed in diagnostic criteria. Today that would be known as autism spectrum disorder, classified as level one to three based on the type and severity of the disorder. Like so many other parents with special needs children, Lauren's parents faced many trials and tribulations with treatment options including health costs, limited yet very expensive treatment options that did not always work, and dealing with people who oftentimes misunderstood Lauren. When Lauren was a young child growing up in the 1980s and 90s in a rural area in eastern Kentucky, little was known about the Autism Spectrum in general, let alone the high-functioning type of the disorder that Lauren has. Because of this, Lauren often felt stigmatized for her condition, in addition to feeling isolated and alone. Like many others with Autism Spectrum Disorders, Lauren has faced her share of challenging symptoms, and in this book, she shares her personal experience with High Functioning Autism and how it has impacted her life. In this memoir book written by Lauren firsthand about her entire life, she explains what it was like to live with autism spectrum disorder from a personal perspective and hopes to also educate others about the condition and erase the stigma associated with the disorder.

My Complicated Yet Wonderful Life Terri Spitzer, 2023-06-26 This is a story about a young girl who was born in 1962 and grew up in a small suburb in Denver, Colorado. She had an older brother and sister and a younger sister. She differed from her siblings in that as a child, she had endless amounts of energy and enthusiasm and wanted to learn and do as much as she could academically and athletically. She was a quick learner and always had high expectations for herself, not to be a show off, but to prove to herself that she could do it. She preferred to play sports with her brother, who was six years older than her, and he was not afraid to show her some of the hard knocks of playing football or baseball. She was willing to take whatever it took to be able to play. When she was four years old, her mother had taken her grandmother to visit a friend. While they waited, her mother taught her to memorize the Pledge of Allegiance. She loved to learn and could not wait to go to school. In elementary school, she had a wonderful first-grade teacher who taught her and other children reading skills that allowed them to read at higher levels. By second grade, they were all reading at the seventh-grade level. As she went through elementary school, she would be studying in all subjects the higher level of courses. As she entered junior high school, she knew that the classes would be more difficult and that there would be a

lot more homework She was able to keep up with the work and in the fall she signed up for the basketball team She loved playing at a higher level and meeting some new friends By Christmastime she began to have less energy and noticed that she was a little more tired than usual As spring approached she signed up for the track team She was never much of a runner but she thought it would help her get in shape Over spring break she would try and practice running 100 yard dashes and would notice how difficult it was and how tired it would make her She participated in most of the track meets and toward the end of April started developing an open sore on her right forearm Early in May her fatigue was getting worse The sore on her arm was not healing and she began running a fever She would miss over two weeks of school and one day her fever went up to 105 degrees and they took her to the doctor who gave her a shot of penicillin It slowly brought the temperature down to 101 102 The sore on her arm continued to get worse and her level of endurance kept going down On Friday her mom had her go back to school even though her temperature was still 101 degrees and she wrapped her arm up Her mom who worked for a doctor picked her up from school and took her to have blood drawn She would go to work with her mom on Monday and he would have the results of the blood work and examine her She had no idea about what she was about to find out or what would lie ahead of her Certification Requirements for School Personnel ,1957 *A Manual on Certification*
