Ham, L. T. Cotton, 2013-12-20 The majority of amputations in the western world today are due to vascular disease Despite the advances in surgical treatment of this disease particularly by reconstruction it is a sad fact that the number of amputations performed in these countries each year for vascular disease is increasing Most of these amputees are elderly and their life expectancy is short so it is important that the treatment and rehabilitation that they receive is informed appropriate efficient and swift to enable them to return successfully to life in the community for their remaining years Management of this group of patients has proved to be successful only if a multidisciplinary team approach is adopted Until recently in the UK this approach sadly has only been implemented by a few centres However with the publication of the

McColl report into the prosthetic and wheelchair service in 1986 interest in the care of the amputee is growing throughout the country This book covers all aspects of amputation from disease and diagnosis to rehabilitation and community discharge with emphasis on the management of the largest group the vascular lower limb amputee A team approach is described and emphasized as being essential for good results and subsequent successful return into the community The role of each of the important disciplines is described in relation to the appropriate part of the rehabilitation phase Prosthetic Restoration and Rehabilitation of the Upper and Lower Extremity Mary Catherine Spires, PT, MD, Brian Kelly, DO, Alicia Davis, MPA, CPO, FAAOP, 2013-12-19 Prosthetic Restoration and Rehabilitation of the Upper and Lower Extremity is a well illustrated state of the art reference on the science and practice of post amputation care prosthetic restoration and functional rehabilitation designed to maximize patient independence and quality of life Chapters are written by physiatrists prosthetists surgeons and therapists at the University of Michigan clinicians and teachers who work with amputees on a daily basis Clinically oriented it covers both lower and upper extremity restoration and rehabilitation and serves as a handy reference for busy practitioners to support sound clinical decision making Beginning with basic anatomy kinesiology and a recap of surgical decisions principles and post operative care for amputees the book discusses biomechanics clinical assessment prosthetic options how to write a complete and detailed prescription for the prosthesis restoration and management of specific problems by region and rehabilitation programs and strategies Common medical issues such as phantom limb sensation and pain skin problems and sexual and psychological considerations are discussed as well In depth coverage of prosthetic restoration is provided for special populations such as infants children the elderly athletes multi extremity amputees and those who have lost limbs to cancer Chapters are written in expanded outline format for ease of use and feature numerous full color diagrams photos and other illustrations This text will guide physicians trainees and other members of the care team through the fundamentals of restoring function to individuals who have lost limbs or body parts Key Features Provides a state of the art accessible clinical approach to post amputation care prosthetic restoration and functional rehabilitation Covers both upper and lower extremities Addresses prostheses for special populations and sports and recreation Includes boxed clinical pearls at the start of each chapter illustrated quick reference tables and full color photos throughout Supports clinical decision making and addresses practical questions and problems Advises on new requirements for Medicare and Medicaid patients and includes patient education materials and sample prescription forms that can be customized for use in any clinic Outlines important information for returning to the community after amputation
