In-text Citations and List of References

Based on the *Publication Manual of the American Psychological Association*, 6th edition. Paper copies are available at the Main and Science Libraries reference desks, call number Main Ref or Sci Ref BF76.7 .P83 2010, or at the 3rd floor Central Help Desk at the Miller Learning Center.

In-text citations are added to a sentence where you cite or refer to a text or idea that is not your own and generally consist of the author's last name, year of publication, and, if needed, a page number. *There is little in common between cave drawings and children's art (Jolley, 2010, p. 8).*

- **If you use the author's name in a sentence**, do not repeat the name in the citation: *Jolley (2010) found little in common between cave drawings and children's art (p. 8) or Jolley (2010) found "a close connection between developments in primitive art and children's drawings [is] largely unfounded" (p. 8).*
- **If a work has two authors**, use both names separated by "and" in the text or with an ampersand in an in-text citation: *Sosik and Jung (2010) compared resolving leadership issues to studying an illness (p. 7) or (Sosik & Jung, 2010, p. 7).*
- **If a work has three to five authors**, use all the names in your first in-text citation: *(Nosko, Wood, & Molema, 2010)*, and the first author plus et al in later citations: *(Nosko et al., 2010)*. If your work has six or more authors, use the first author plus et al. beginning with the first citation.
- **If a work has no authors**, use the title of the work in your in-text citation. Anonymous, if it is used as the author's name in a book or article, should be used as an author name in your in-text citation or list of references.

The list of references should be in a separate section at the end of your paper. Items in the list of references are in alphabetical order by author last name, or by title (first word after *the*, *a*, or *an*) if no author name is available.

- **Authors** are listed by last name, then initials, with periods after first and middle initials. List authors in the order they are listed on the book or article. For two to seven authors, list all authors, with an ampersand before the last name. Organizations may be listed as authors.
- **Titles:** for books or articles, capitalize only the first word and the first word of any subtitle. For journal titles, capitalize all significant words. Capitalize any proper name in a title.

Very few students and even professionals know how to write using American Psychological Association Style You are not the only one Beth Lee knows this to be true because she has been teaching APA style for more than a dozen years Shes accustomed to hearing students say things such as What is APA How do I use it Cant I just use MLA The reality is that many professors instructors and professions insist on using APA Style In this guide youll learn how to take down information to make citing easier look up information in style guides memorize the most important rules and avoid the most common mistakes While it would be easy to copy and paste web addresses into essays and academic papers that is not how APA Style works If you dont know the rules your writing wont be taken as seriouslyand if youre in schoolyour marks will suffer Once you understand the main elements of APA style youll be equipped to use more complex style guides and reference materials Bolster your academic writing today with lessons in The ABCs of APA Style **Analysis and Visualization of Citation Networks** Dangzhi Zhao,Andreas Strotmann,2022-06-01

Citation analysis the exploration of reference patterns in the scholarly and scientific literature has long been applied in a number of social sciences to study research impact knowledge flows and knowledge networks It has important information science applications as well particularly in knowledge representation and in information retrieval Recent years have seen a burgeoning interest in citation analysis to help address research management or information service issues such as

university rankings research evaluation or knowledge domain visualization This renewed and growing interest stems from significant improvements in the availability and accessibility of digital bibliographic data both citation and full text and of relevant computer technologies The former provides large amounts of data and the latter the necessary tools for researchers to conduct new types of large scale citation analysis even without special access to special data collections Exciting new developments are emerging this way in many aspects of citation analysis This book critically examines both theory and practical techniques of citation network analysis and visualization one of the two main types of citation analysis the other being evaluative citation analysis To set the context for its main theme the book begins with a discussion of the foundations of citation analysis in general including an overview of what can and what cannot be done with citation analysis Chapter 1 An in depth examination of the generally accepted steps and procedures for citation network analysis follows including the concepts and techniques that are associated with each step Chapter 2 Individual issues that are particularly important in citation network analysis are then scrutinized namely field delineation and data sources for citation analysis Chapter 3 disambiguation of names and references Chapter 4 and visualization of citation networks Chapter 5 Sufficient technical detail is provided in each chapter so the book can serve as a practical how to guide to conducting citation network analysis and visualization studies While the discussion of most of the topics in this book applies to all types of citation analysis the structure of the text and the details of procedures examples and tools covered here are geared to citation network analysis rather than evaluative citation analysis This conscious choice was based on the authors observation that compared to evaluative citation analysis citation network analysis has not been covered nearly as well by dedicated books despite the fact that it has not been subject to nearly as much severe criticism and has been substantially enriched in recent years with new theory and techniques from research areas such as network science social network analysis or information visualization
