

Method

This research aims to gain insight into the relationship between smart students' attention in classrooms. This chapter further discusses the research sampling method and the data analysis procedure.

Research Method

In addition to an extensive literature review, 40 interviews were conducted as part of the study. The goal of conducting interviews was to find out how students look at smartphones in the classroom.

Procedure. Participants were given an introductory text prior to the study. In the introductory text, the participants were informed that all answers would be given anonymously.

Participant recruitment. Students who participated in this study were recruited through posts on the school's Facebook page. As an incentive, students who participated were granted an exemption for writing an essay.

Participant assessment. Participants were selected based on their age and gender to acquire a representative sample of the population. Furthermore, students had to share
