Fleming-May, Regina Mays, 2021-07-23

The concepts of planning and assessment are intrinsically linked and understanding them is essential for raising the library's profile and strengthening its position among stakeholders and the community. Even if you're an LIS student or are new to the profession or if planning or assessment are not your primary areas of responsibility, you still have a role to play in the success of organizational efforts. Fleming May has more than a decade of experience in planning and assessment initiatives and instruction, and May was her institution's first assessment librarian. Their primer draws from theory, research, and their first-hand observations to illuminate such topics as characteristics of bad planning strategy that can help to illustrate a better approach, reasons why using economic models like ROI fall short, how to mix the three types of planning guidelines to ensure that assessment is meaningful, and actionable tips for creating effective surveys emphasizing users' needs with a critical assessment framework, data analysis for surveys, interviews, focus groups, and observation, four questions to ask about audience level before you develop a report, a sample 3-year assessment plan that can be customized, and seven steps for developing a culture of ongoing assessment.

Advancing Online Teaching Kevin Kelly, Todd D. Zakrajsek, 2023-07-03

The goal of teaching online is fundamentally the same as teaching face-to-face: facilitating the learning of all students to the greatest extent possible. This book differs from other books on online teaching in that in the process of offering guidance on course design and planning, developing outcomes and appropriate engaging activities, managing the workload, and assessment, the authors pay explicit attention throughout to the distinct and diverse needs of students and offer effective strategies to accommodate them in a comprehensive and inclusive way by using the principles of Universal Design for Learning. By following those principles from the outset when planning a course, all students will benefit, and most particularly those whom the research shows have the greatest achievement gaps when taking online courses: males, first-generation and low-income students, those from underrepresented minority groups, the academically underprepared students with disabilities, and those with limited online access or lacking readiness for online learning. Beyond good planning and design, Kelly and Zakrajsek offer ideas for creating inclusive course environments and activities such as using culturally appropriate content and making it accessible in multiple formats. They also share methods to foster faculty-learner interaction and increase personal connections with students and among students through group activities or learning communities, which are so critical to motivation and success. Faculty new to online teaching as well as more experienced readers will find a wealth of practical guidance on developing and honing both fully online and blended courses, and as importantly, a wealth of proven ideas to help the new generation of students with diverse needs to succeed.
