The Art and Science of HDR Imaging John J. McCann, Alessandro Rizzi, 2011-10-04 Rendering High Dynamic Range HDR scenes on media with limited dynamic range began in the Renaissance whereby painters then photographers learned to use low range spatial techniques to synthesize appearances rather than to reproduce accurately the light from scenes The Art and Science of HDR Imaging presents a unique scientific HDR approach derived from artists understanding of painting emphasizing spatial information in electronic imaging Human visual appearance and reproduction rendition of the HDR world requires spatial image processing to overcome the veiling glare limits of optical imaging in eyes and in cameras Illustrated in full colour throughout including examples of fine art paintings HDR photography and multiple exposure scenes this book uses techniques to study the HDR properties of entire scenes and measures the range of light of scenes and the range that cameras capture It describes how electronic image processing has been used to render HDR scenes since 1967 and examines the great variety of HDR algorithms used today Showing how spatial processes can mimic vision and render scenes as artists do the book also Gives the history of HDR from artists spatial techniques to scientific image processing Measures and describes the limits of HDR scenes HDR camera images and the range of HDR appearances Offers a unique review of the entire family of Retinex image processing algorithms Describes the considerable overlap of HDR and Color Constancy two sides of the same coin Explains the advantages of algorithms that replicate human vision in the processing of HDR scenes Provides extensive data to test algorithms and models of vision on an accompanying website www.wiley.com/go/mccannhdr

Abstraction in Science and Art Chiara Ambrosio, Julia Sánchez-Dorado, 2024-09-30 This volume explores the roles and uses of abstraction in scientific and artistic practice Conceived as an interdisciplinary dialogue between experts across histories and philosophies of art and science this collection of essays draws on the shared premise that abstraction is a rich and generative process not reducible to the mere omission of details in a representation When scientists attempt to make sense of complex natural phenomena they often produce highly abstract models of them In the history and philosophy of art there is a long tradition of debate on the function of abstraction and more recently its relation with theories of depiction Adopting a process oriented perspective the chapters in this volume explore the epistemic potential of a diversity of practices of abstracting The systematic analysis of a wide range of historical cases from early twentieth century abstractionist painting to contemporary abstract photography and from nineteenth century physics to recent research in biology and neurosciences invites the reader to reflect on the material lives of abstraction through concrete artefacts experimental practices and theoretical and aesthetic achievements

Abstraction in Science and Art Philosophical Perspectives will be of interest to scholars and advanced students working in aesthetics philosophy of science and epistemology as well as to historians of science and art and to practicing artists and scientists interested in exploring foundational questions at the heart of the creative practice of abstracting
