Design Science Methodology for Information Systems and Software Engineering Roel J. Wieringa,2014-11-19 This book provides guidelines for practicing design science in the fields of information systems and software engineering research A design process usually iterates over two activities first designing an artifact that improves something for stakeholders and subsequently empirically investigating the performance of that artifact in its context This validation in context is a key feature of the book since an artifact is designed for a context it should also be validated in this context The book is divided into five parts Part I discusses the fundamental nature of design science and its artifacts as well as related design research questions and goals Part II deals with the design cycle i e the creation design and validation of artifacts based on requirements and stakeholder goals To elaborate this further Part III presents the role of conceptual frameworks and theories in design science Part IV continues with the empirical cycle to investigate artifacts in context and presents the different elements of research problem analysis research setup and data analysis Finally Part V deals with the practical application of the empirical cycle by presenting in detail various research methods including observational case studies case based and sample based experiments and technical action research These main sections are complemented by two generic checklists one for the design cycle and one for the empirical cycle The book

is written for students as well as academic and industrial researchers in software engineering or information systems It provides guidelines on how to effectively structure research goals how to analyze research problems concerning design goals and knowledge questions how to validate artifact designs and how to empirically investigate artifacts in context and finally how to present the results of the design cycle as a whole *Let's Talk with Each Other!* Ulf Lubienetzki, Heidrun Schüler-Lubienetzki, 2022-01-03 Through this compact textbook you will learn in an entertaining way about the most important form of human communication the personal conversation and its essential facets It focuses primarily on communication in a professional context but the principles can of course also be applied to other areas of life Learn how we communicate not only with the spoken word but also with our bodies how we establish contact with our conversation partners and how we achieve that other people feel like and are interested in talking to us This book is a translation of the original German 1st edition *Lass uns miteinander sprechen* by Heidrun Schüler-Lubienetzki Ulf Lubienetzki published by Springer Verlag GmbH Germany part of Springer Nature in 2020 The translation was done with the help of artificial intelligence machine translation by the service DeepL.com A subsequent human revision was done primarily in terms of content so that the book will read stylistically differently from a conventional translation Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors
