Anathem Neal Stephenson, 2010-08-01 The latest magnificent creation from the award winning author of Cryptonomicon and the Baroque Cycle trilogy Erasmus Raz is a young avout living in the Concenter a sanctuary for mathematicians scientists and philosophers Three times during history s darkest epochs violence has invaded and devastated the cloistered community Yet the avouts have always managed to adapt in the wake of catastrophe But they now prepare to open the Concenter s gates to the outside world in celebration of a once a decade rite Suddenly Erasmus finds himself a major player in a drama that will determine the future of his world as he sets out on an extraordinary odyssey that will carry him to the most dangerous inhospitable corners of the planet and beyond

The Materiality of Narrative Dynamics Stefan Iversen, Evan Van Tassel, 2025-06-02 The dynamic nature of storytelling has long been one of the major concerns of narrative research but relatively little scholarship has engaged with the relationship between storytelling dynamics and the underlying material forms of cultural texts This volume seeks to remedy this by asking questions such as How might the affordances of new media guide audience reception in subtle ways How might the dynamism of legacy media be better recognized when examined through a multimedial lens How do the physical processes of production define the horizons of both authorial activity and audience response The insight that drives these investigations is two fold first that functions and effects of narratives are deeply intertwined with material forces of production distribution and reception and second that an analysis of any specific narrative must include attention to these material matters and how they affect the unfolding of stories over time

The chapters in this collection explore interplays between material forces and narrative dynamics across a range of genres and intellectual arenas In doing so they both fill gaps in current methodological frameworks and call attention to the many gaps that are yet to be filled

True Stories Francis Spufford, 2017-01-01 An irresistible collection of favorite writings from an author celebrated for his bravura style and sheer unpredictability Francis Spufford's welcome first volume of collected essays gathers an array of his compelling writings from the 1990s to the present He makes use of a variety of encounters with particular places writers or books to address deeper questions relating to the complicated relationship between story telling and truth telling How must a nonfiction writer imagine facts vivifying them to bring them to life How must a novelist create a dependable world of story within which facts are in fact imaginary And how does a religious faith felt strongly to be true but not provably so draw on both kinds of writerly imagination Ranging freely across topics as diverse as the medieval legends of Cockaigne the Christian apologetics of C S Lewis and the tomb of Ayatollah Khomeini Spufford provides both fresh observations and thought provoking insights No less does he inspire an irresistible urge to turn the page and read on

Contemporary Science Fiction and The Many-Worlds Interpretation of Quantum Mechanics Jonathan P. Lewis, 2025-10-02 This book seeks to create a new means of interrogating the direction in which contemporary science fiction is progressing In the late 1950s Hugh Everett III suggested that there is no way to say that there are not as many versions of what we experience as reality as there are particles in the universe This movement in contemporary science fiction serves as the foreground for the sense of loss and the need for sacrifice to set things right after generations of technological praxis by the nations and communities that have traditionally driven science fiction the Global North that have damaged communities throughout the Global South Colonialism and the drives for spheres of influence in the Cold War are now being met with the realities of such existential threats as global climate change Narratives about the loss of control over time reality and human consciousness demonstrate

the on going ideological crises of faith in institutions like religion capitalism and education It is the grief for lost utopian dreams for the future that drives this interest in Everett s Many Worlds Interpretation of Quantum Mechanics or MWI

This Book So Great Jo Walton,2014-01-16 Jo Walton is an award winning author of inveterate reader of and chronic re reader of science fiction and fantasy books What Makes This Book So Great is a selection of the best of her musings about her prodigious reading habit Jo Walton s many subjects range from acknowledged classics to guilty pleasures to forgotten oddities and gems Among them the Zones of Thought novels of Vernor Vinge the question of what genre readers mean by mainstream the under appreciated SF adventures of C J Cherryh the field s many approaches to time travel the masterful science fiction of Samuel R Delany Salman Rushdie s Midnight s Children the early Hainish novels of Ursula K Le Guin and a Robert A Heinlein novel you have most certainly never read Over 130 essays in all What Makes This Book So Great is an immensely engaging collection of provocative opinionated thoughts about past and present day fantasy and science fiction from one of our best writers IN THE BEGINNING: Great Opening Lines From Your Favorite Books Hans

Bauer,2023-11-04 Dear Reader IN THE BEGINNING presents the all important first sentence of 1 000 famous and not so famous novels plus a handful of short stories A smorgasbord of popular fiction from around the world ideally these opening lines will have a tremendous attraction for lovers of literature everywhere IN THE BEGINNING is more than just a novelty book Anyone who loves books not only enjoys being reminded of their favorites but also delights in finding a good one they ve missed Those who relish reading and writing will savor a collection that brings back memories of beloved books and often the times in which they were read From Virginia Woolf to Tom Wolfe from Edith Wharton to Stephen King from Ernest Hemingway to Gabriel Garcia Marquez masterpieces of world literature are juxtaposed with trendy best sellers romances with westerns classics with cult favorites Some lines are well remembered others rarely recalled still others are brilliant

beginnings from relatively obscure books But in every case IN THE BEGINNING confirms how powerful a sentence can be Bumping into a familiar line from a beloved novel fills the reader's mind with imagery The great fish moved silently through the night water propelled by short sweeps of its crescent tale Jaws by Peter Benchley While dazzling openers don't guarantee a worthwhile novel expectations run high when we're introduced with Paint me a railroad station then ten minutes before dark John Cheever's Bullet Park or There were 117 psychoanalysts on the Pan Am flight to Vienna and I'd been psychoanalyzed by at least six of them Fear of Flying by Erica Jong Some books reach their zenith with wonderful first lines that are never matched I had this story from one that had no business to tell it to me or to any other That's our initial meeting with the Tarzan series Conversely some rather mundane opening lines are made better because we know the marvelous story that follows like B Traven's Treasure of the Sierra Madre The bench on which Dobbs was sitting was not so good Perhaps not truly memorable but a truly unforgettable character and Bogie didn't do badly by him either Enjoy Hans Bauer **Robot**

Souls Eve Poole, 2023-08-01 Two of the biggest design problems in Artificial Intelligence are how to build robots that behave in line with human values and how to stop them ever going rogue One under-explored solution to these alignment and control problems might be to examine how these are already addressed in the design of humans Looking closely at the human blueprint it contains a suite of capacities that are so clumsy they have generally been kept away from AI It was assumed that robots with features like emotions and intuition that made mistakes and looked for meaning and purpose would not work as well as robots without this kind of code But on considering why all these irrational properties are there it seems that they emerge from the source code of soul Because it is actually this junk code that makes us human and promotes the kind of reciprocal altruism that keeps humanity alive and thriving Robot Souls looks at developments in AI and reviews the emergence of ideas of consciousness and the soul It places our junk code in this context and argues that it is time to foreground that code and to use it to look again at how we are programming AI The book author Eve Poole received an OBE in the 2023 New Year Honours for services to education and gender equality [Inside Steve's Brain](#) Leander
