

APA (6th edition) Referencing Style

This referencing style sheet is to be used in conjunction with the Library's general Guide to Citing & Referencing. The information is based on the following manual from the American Psychological Association (APA):

American Psychological Association. (2010). *Publication manual of the American Psychological Association* (6th ed.). Washington, DC: Author.

For help with referencing items not covered in this guide:

You might like to refer to either the *Publication manual of the American Psychological Association* (6th ed.) or the more compact version, *Concise rules of APA style* (6th ed.). Both manuals are available in the Library, on Level 3, at shelf mark 808.06615 AME. You can also access the following ebook via the Library Catalogue: [The complete guide to referencing and avoiding plagiarism](#) - this includes examples for APA and other styles.

Citation

The APA uses an author-date style of referencing with details entered in round brackets, for example:

The traditional approach to human cognition is over-simplified in assuming that processing is typically serial (Eysenck & Keane, 2010).

Treatment of multiple authors: when a work has two authors, cite both authors every time. When a work has three, four or five authors, cite all authors the first time a reference occurs. In subsequent citations, include only the surname of the first author followed by et al. See:

Kisangau, Lyanuu, Hosea, and Joseph (2007) found that ... [first time cited]

Kisangau et al. (2007) found that ... [subsequent citations]

When a work has six or more authors, cite only the surname of the first author followed by et al. and the year of publication for the first and subsequent citations.

Reference list

The reference list should contain full details of all the sources mentioned in your text, arranged alphabetically by surname of first author.

Reference examples

Below are some examples of the more common types of document you might want to reference. Each gives the APA 6th ed. format for the reference, followed by an example. **Treatment of multiple authors within reference list:** when authors number eight or more, include the first six authors' names then insert three ellipses and add the last author's name. For example:

Kisangau, A., Lyanuu, B., Hosea, C., Joseph, D., Rogers, T., Tylee, C., . . . Humphreys, L. J. (2007). *Psychology*. Birmingham: ABC Press.

Information Literacy Instruction that Works Patrick

Ragains, 2013-06-27 Information literacy and library instruction are at the heart of the academic library's mission. But how do you bring that instruction to an increasingly diverse student body and an increasingly varied spectrum of majors? In this updated, expanded new second edition featuring more than 75% new content, Ragains and 16 other library instructors share their best practices for reaching out to today's unique users. Readers will find strategies and techniques for teaching college and university freshmen, community college students, students with disabilities, and those in distance learning programs. Alongside sample lesson plans, presentations, brochures, worksheets, handouts, and evaluation forms, Ragains and his contributors offer proven approaches to teaching students in the most popular programs of study, including English, Literature, Art and Art History, Film Studies, History, Psychology, Science, Agricultural Sciences, and Natural Resources. Hospitality, Business, Music, Anthropology, Engineering. Coverage of additional special topics, including legal information for non-law students, government information, and patent searching, make this a complete guide to information literacy instruction.

Essentials of Assessment Report Writing W. Joel Schneider, Elizabeth O. Lichtenberger, Nancy

Mather, Nadeen L. Kaufman, 2018-09-19 The bestselling guide to reporting writing, updated and reworked for today's practice. Essentials of Assessment Report Writing offers effective solutions to the creation of reader-friendly yet targeted psychological and educational assessment reports. Parents, clinicians, clients, and other readers need more than test-by-test descriptions; they need an accessible analysis of the entire situation to determine their next steps. This book provides clear guidance for busy practitioners seeking ways to improve their report-writing skills. With a focus on current practice, this new second edition covers DSM-5 updates and the latest assessment instruments, including the WJ-IV, WISC-V, WAIS-IV, KTEA-3, and the CAS-2. New discussion includes advice on tailoring the report to the audience, and annotated case reports provide illustrative models of effective report styles. Interpretation and analysis: Key concepts are highlighted for quick reference throughout, and end-of-chapter questions help reinforce understanding. Reporting styles vary widely within the field, in both content and style; there is no definitive standard, but many reports fail to reflect best practices and therefore prove less than useful to the reader. This book provides expert guidance throughout the reporting process to help practitioners provide high-quality, accessible reports. Integrate assessment results to provide a person-centered report. Identify and navigate critical decision points in the interpretive process. Write efficiently yet effectively while enhancing the reader's experience. Provide an accurate, informative, and readable assessment report. Incorporate practical recommendations to address the referral concerns. Expertly conducted assessments should culminate with a carefully constructed analysis that provides direction via clear communication. Because this report will be used to inform treatment, intervention, and ultimately the client's quality of life, it is critical that it provides clear, informative guidance in a way that readers can understand. Essentials of Assessment Report Writing provides comprehensive guidelines for navigating through the report-writing process.

The HM Learning

and Study Skills Program Judy Tilton Brunner, Matthew S. Hudson, 2016-10-14 Level III Grades 11-13 The Learning and Study Skills Program Level III was designed to provide an introduction to learning and study skills for high school juniors and seniors and beginning college students through a series of activity-oriented units. It is structured on the assumption that an activity-oriented lesson is the most effective instructional strategy for the teaching of study skills; more succinctly, that learning by doing is the best way to study smart. Learning and study skills are important for learning. They are methods and ways of doing things that help make learning easier. Understanding how to study can also facilitate learning by assisting students as they complete assignments correctly and efficiently during a specified period of time. Just like any other skill, knowing how to learn and study proficiently must be learned and practiced over time. The Program has been designed to help students learn more efficiently and effectively.
