Hypernomics Doug Howarth,2024-01-23 You ve Never Seen What You ve Always Needed to Know Until Now Invisible forces are at work They push and shove on everything you buy or sell They affect every concept you want to take to market all the suppliers you ll deal with and every customer you

ll ever see To be successful you need to understand them See them in detail in ways not possible with other methods
Hypernomics Using Hidden Dimensions to Solve Unseen Problems discovers that markets behave according to previously unknown laws set by the buyers and sellers within them It reveals those rules and how to detect describe and deploy them to your advantage It doesn't change economics so much as reveal it It's like a microscope looking at pond water a telescope tilted to the sky sonar scanning the bottom of the ocean Hypernomics lets you see into markets in ways you can't with the unaided eye Sailors never navigate without a map You shouldn't either since your ship could wind up on the rocks
Hypernomics gives you the means to create market maps that show you where they have openings and how to fill them by giving customers what they want don't have and can afford It finds their thresholds and limits and responses to every possible feature in any product you can offer The interactions Hypernomics describes have been with us since the dawn of humanity Now you can finally see them and enjoy the advantages your competitors do not have Validated by 13 published papers multiple awards a patent and customers such as NASA Lockheed Martin Virgin Galactic and a restaurant down the street only Hypernomics gives you the ability to solve problems as varied as How could a restaurant increase revenue by 25% by rearranging seating How do you find describe and capitalize on open spaces in your market What happens when an NFL player decreases his forty yard dash time by a quarter of a second If you tried to exceed a market's limitations how could you lose 1B How do markets change over time Know what you need to Discover Hypernomics

Machine Learning Toolbox for Social Scientists Yigit Aydede, 2023-09-22 Machine Learning Toolbox for Social Scientists covers predictive methods with complementary statistical tools that make it mostly self-contained The inferential statistics is the traditional framework for most data analytics courses in social science and business fields especially in Economics and Finance The new organization that this book offers goes beyond standard machine learning code applications providing intuitive backgrounds for new predictive methods that social science and business students can follow The book also adds many other modern statistical tools complementary to predictive methods that cannot be easily found in econometrics textbooks nonparametric methods data exploration with predictive models penalized regressions model selection with sparsity dimension reduction methods nonparametric time series predictions graphical network analysis algorithmic optimization methods classification with imbalanced data and many others This book is targeted at students and researchers who have no advanced statistical background but instead coming from the tradition of inferential statistics The modern statistical methods the book provides allows it to be effectively used in teaching in the social science and business fields Key Features The book is structured for those who have been trained in a traditional statistics curriculum There is one long initial section that covers the differences in estimation and prediction for people trained for causal analysis The book develops a background framework for Machine learning applications from Nonparametric methods SVM and NN simple enough without too much detail It's self-sufficient Nonparametric time series predictions are new and covered in a separate section Additional sections are added Penalized
