Joint Publications Research Service, 1967 *Multicultural Science Education* Mary M. Atwater, Melody Russell, Malcolm B. Butler, 2013-11-19 This book offers valuable guidance for science teacher educators looking for ways to facilitate preservice and inservice teachers pedagogy relative to teaching students from underrepresented and underserved populations in the science classroom It also provides solutions that will better equip science teachers of underrepresented student populations with effective strategies that challenge the status quo and foster classrooms environment that promotes equity and social justice for all of their science students *Multicultural Science Education* illuminates historically persistent yet unresolved issues in science teacher education from the perspectives of a remarkable group of science teacher educators and presents research that has been done to address these issues It centers on research findings on underserved and underrepresented groups of students and presents frameworks

perspectives and paradigms that have implications for transforming science teacher education. In addition, the chapters provide an analysis of the socio-cultural-political consequences in the ways in which science teacher education is theoretically conceptualized and operationalized in the United States. The book provides teacher educators with a framework for teaching through a lens of equity and social justice, one that may very well help teachers enhance the participation of students from traditionally underrepresented and underserved groups in science, technology, engineering, and mathematics (STEM) areas and help them realize their full potential in science. Moreover, science educators will find this book useful for professional development workshops and seminars for both novice and veteran science teachers. *Multicultural Science Education: Preparing Teachers for Equity and Social Justice* directly addresses the essential role that science teacher education plays for the future of an informed and STEM-knowledgeable citizenry. The editors and authors review the beginnings of multicultural science education and then highlight findings from studies on issues of equity, underrepresentation, cultural relevancy, English language learning, and social justice. The most significant part of this book is the move to the policy level, providing specific recommendations for policy development, implementation, assessment, and analysis, with calls to action for all science teacher educators and, very significantly, all middle and high school science teachers and prospective teachers. By emphasizing the important role that multicultural science education has played in providing the knowledge base and understanding of exemplary science education, *Multicultural Science Education: Preparing Teachers for Equity and Social Justice* gives the reader a scope and depth of the field along with examples of strategies to use with middle and high school students. These classroom instructional strategies are based on sound science and research. Readers are shown the balance between research-based, data-driven models articulated with successful instructional design. Science teacher educators will find this volume of great value as they work with their pre-service and in-service teachers about how to address and infuse multicultural science education within their classrooms. For educators to be truly effective in their classrooms, they must examine every component of the learning and teaching process. *Multicultural Science Education: Preparing Teachers for Equity and Social Justice* provides not only the intellectual and research bases underlying multicultural studies in science education but also the pragmatic side. All teachers and teacher educators can infuse these findings and recommendations into their classrooms in a dynamic way and ultimately provide richer learning experiences for all students. Patricia Simmons, North Carolina State University, Raleigh, USA. This provocative collection of chapters is a presentation in gutsiness. Ingenious in construction and sequencing, this book will influence science teacher educators by introducing them to issues of equity and social justice directly related to women and people of color. The authors unflinchingly interrogate issues of equity which need to be addressed in science education courses. This provocative collection of chapters is a presentation in gutsiness.
