Mackey,2013-06-29 In The American Father Wade C Mackey documents a wealth of information demonstrating the vast benefits to society when its children are raised in families with fathers The biopsychosocial approach Mackey in human employs is consistent with the current treatment of topics development This approach which is grounded in a variety of diverse sources assumes that we understand little about people when we study them a bit at a time rather the fullness of the individual requires a fullness of examination For example in the cases of fathers we note that humans do not reproduce alone after all we are not an asexual species No human reproduction and its sequelae are social just as clearly as they are biological and involve the whole panoply of psychic function motivation sociability intelligence and the like The evidence marshaled by Mackey indicates strongly that individuals and societies have an essential requirement for something more than mothering they also need fathering Much of the discourse and publication on fathers during the past several decades has been posited on a more is better model of male parenting in which it is seldom stated who it is better for the father the child the mother the couple or the family Further much of this discussion infers that fathers are merely Mr Moms yet this is not so **American Indian and Alaska Native Elders** United States. Developmental Psychology David Messer,2002-09-26 First published in 1993 Routledge is an imprint of Taylor Francis an informa company Asian American Political Participation Janelle S. Wong,S. Karthick Ramakrishnan,Taeku Lee,Jane

Junn,Janelle Wong,2011-10-01 Asian Americans are a small percentage of the U S population but their numbers are steadily rising from less than a million in 1960 to more than 15 million today They are also a remarkably diverse population representing several ethnicities religions and languages and they enjoy higher levels of education and income than any other U S racial group Historically socioeconomic status has been a reliable predictor of political behavior So why has this fast growing American population which is doing so well economically been so little engaged in the U S political system Asian American Political Participation is the most comprehensive study to date of Asian American political behavior including such key measures as voting political donations community organizing and political protests The book examines why some groups participate while others do not why certain civic activities are deemed preferable to others and why Asian socioeconomic

advantage has so far not led to increased political clout Asian American Political Participation is based on data from the authors groundbreaking 2008 National Asian American Survey of more than 5 000 Chinese Indian Vietnamese Korean Filipino and Japanese Americans The book shows that the motivations for and impediments to political participation are as diverse as the Asian American population For example native born Asians have higher rates of political participation than their immigrant counterparts particularly recent adult arrivals who were socialized outside of the United States Protest activity is the exception which tends to be higher among immigrants who maintain connections abroad and who engaged in such activity in their country of origin Surprisingly factors such as living in a new immigrant destination or in a city with an Asian American elected official do not seem to motivate political behavior neither does ethnic group solidarity Instead hate crimes and racial victimization are the factors that most motivate Asian Americans to participate politically Involvement in non political activities such as civic and religious groups also bolsters political participation Even among Asian groups socioeconomic advantage does not necessarily translate into high levels of political participation Chinese Americans for example have significantly higher levels of educational attainment than Japanese Americans but Japanese Americans are far more likely to vote and make political contributions And Vietnamese Americans with the lowest levels of education and income vote and engage in protest politics more than any other group Lawmakers tend to favor the interests of groups who actively engage the political system and groups who do not participate at high levels are likely to suffer political consequences in the future Asian American Political Participation demonstrates that understanding Asian political behavior today can have significant repercussions for Asian American political influence tomorrow Atlantida; a Case Study in Household Sample Surveys United States. International Economic Policy Coordination Michael Carlberg,2005-08-15 This book studies the international coordination of monetary and fiscal policies in the world economy It carefully discusses the process of policy competition and the structure of policy cooperation As to policy competition the focus is on monetary and fiscal competition between Europe and America Similarly as to policy cooperation the focus is on monetary and fiscal cooperation between Europe and America The spillover effects of monetary policy are negative while the spillover effects of fiscal policy are positive The policy targets are price stability and full employment The policy makers follow either cold turkey or gradualist strategies Policy expectations are adaptive or rational The world economy consists of two three or more regions The present book is part of a larger research project on European Monetary Union see the references at the back of the book Some parts of this project were presented at the World Congress of the International Economic Association in Lisbon Other parts were presented at the International Institute of Public Finance at the Macro Study Group of the German Economic Association at the Annual Meeting of the Austrian Economic Association at the Gottingen Workshop on International Economics at the Halle Workshop on Monetary Economics at the Research Seminar on Macroeconomics in Freiburg and at the Passau Workshop on

International Economics *African American Women in the News* Marian Meyers, 2013-07-24 African American Women in the News offers the first in depth examination of the varied representations of Black women in American journalism from analyses of coverage of domestic abuse and crack mothers to exploration of new media coverage of Michelle Obama on Youtube Marian Meyers interrogates the complex and often contradictory images of African American women in news media through detailed studies of national and local news the mainstream and Black press and traditional news outlets as well as newer digital platforms She argues that previous studies of African Americans and the news have largely ignored the representations of women as distinct from men and the ways in which socioeconomic class can be a determining factor in how Black women are portrayed in the news Meyers also proposes that a pattern of paternalistic racism as distinct from the modern racism found in previous studies of news coverage of African Americans is more likely to characterize the media's treatment of African American women Drawing on critical cultural studies and black feminist theory concerning representation and the intersectionality of gender race and class Meyers goes beyond the cultural myths and stereotypes of African American women to provide an updated portrayal of Black women today African American Women in the News is ideal for courses on African American studies American studies journalism studies media studies sociology studies women's studies and for professional journalists and students of journalism who seek to improve the diversity and sensitivity of their journalistic practice Welcoming America's Newest Commonwealth Northern Mariana Islands Commission on Federal Laws, 1985
