Whistlestop John Dickerson, 2016-08-02 From Face the Nation moderator and contributing editor for The Atlantic John Dickerson come the stories behind the stories of the most memorable moments in American presidential campaign history The stakes are high The characters full of striving and ego Presidential campaigns are a contest for control of power in the most powerful country on earth The battle of ideas has a clear end with winners and losers and along the way there are sharp turning points primaries debates conventions and scandals that squeeze candidates into emergency action

frantic grasping and heroic gambles As Mike Murphy the political strategist put it Campaigns are like war without bullets Whistlestop tells the human story of nervous gambits hatched in first floor hotel rooms failures of will before the microphone and the cross country crack ups of long planned stratagems At the bar at the end of a campaign day these are the stories reporters rehash for themselves and embellish for newcomers In addition to the familiar tales Whistlestop also remembers the forgotten stories about the bruising and reckless campaigns of the nineteenth century when the combatants believed the consequences included the fate of the republic itself Some of the most modern feeling elements of the American presidential campaign were born before the roads were paved and electric lights lit the convention halls or there were convention halls at all Whistlestop is a ride through the American campaign history with one of its most enthusiastic conductors guiding you through the landmarks along the way

Revisiting Intelligence and Policy Stephen Marrin, 2023-04-14 The relationship between intelligence organizations and the national security policymakers which they support has its ups and downs Sometimes the relationship is a good one communication flows and both sides benefit from the interaction but sometimes difficulties arise and problems develop For example when knowledge is required for decision but is not available or is inaccurate the outcome is frequently described as an intelligence failure A subset of this kind of intelligence failure occurs when knowledge is distorted in order to reinforce or oppose policymaker preferences or expectations Another less successful outcome occurs when good accurate knowledge is not used to improve policy but is instead set aside or ignored by those who have the responsibility and obligation to make decisions This collection explores the difficulties that can arise in the relationship between intelligence and policy The chapters consider both politicization of and lack of receptiveness to intelligence on the part of policymakers from a variety of different angles Readers will find that this book challenges conventional wisdom and offers new ways of thinking about this important but understudied area This book was published as a special issue of *Intelligence and National Security*
