American Cinematographer Manual that are most relevant and helpful to students of the craft **Cinematography: Theory and Practice** Blain Brown, 2013-05-02 There's more to being a DP than holding a light meter. With this book as your guide, you are on your way to learning not only about the equipment and technology but also about the concepts and thought processes that will enable you to shoot professionally, efficiently, and with artistic mastery. A leading book in the field, Cinematography has been translated into many languages and is a staple at the world's top film schools. Lavishly produced and illustrated, it covers the entire range of the profession. The book is not just a comprehensive guide to current professional practice; it goes beyond to explain the theory behind the practice so you understand how the rules came about and when it's appropriate to break them. In addition, directors will benefit from the book's focus on the body of knowledge they should share with their Director of Photography. Cinematography presents the basics and beyond, employing clear explanations of standard practice together with substantial illustrations and diagrams to reveal the real world of film production. Recognizing that professionals know when to break the rules and when to abide by them, this book discusses many examples of fresh ideas and experiments in cinematography. Covering the most up-to-date information on the film/digital interface, new formats, the latest cranes and camera support, and other equipment, it also illustrates the classic, tried-and-true methods.

Cross-Cultural Filmmaking Ilisa Barbash, Lucien Taylor, 2023-09-01 This extraordinary handbook was inspired by the distinctive concerns of anthropologists and others who film people in the field. The authors cover the practical, technical, and theoretical aspects of filming from fundraising to exhibition in lucid and complete detail, information never before assembled in one place. The first section discusses filmmaking styles and the assumptions that frequently hide unacknowledged behind them, as well as the practical and ethical issues involved in moving from fieldwork to filmmaking. The second section concisely and clearly explains the technical aspects, including how to select and use equipment, how to shoot film and video, and the reasons for choosing one or the other, and how to record sound. Finally, the third section outlines the entire process of filmmaking: preproduction, production, postproduction, and distribution. Filled with useful illustrations and covering documentary and ethnographic filmmaking of all kinds, Cross-Cultural Filmmaking will be as essential to the anthropologist or independent documentarian on location as to the student in the classroom.
