Porter, Sean A. Adams, 2016-11-03 This two volume set is part of a growing body of literature concerned with the history of biblical interpretation The ample introduction first situates key players in the story of the development of the major strands of biblical interpretation since the Enlightenment identifying how different theoretical and methodological approaches are related to each other and describing the academic environment in which they emerged and developed Volume 1 contains fourteen essays on twenty two interpreters who were principally active before 1980 and volume 2 has nineteen essays on twenty seven of those who were active primarily after this date Each chapter provides a brief biography of one or more scholars as well as a detailed description of their major contributions to the field This is followed by an often new application of the scholar's theory By focusing on the individual scholars and their work the book recognizes that interpretive approaches arise out of certain circumstances and that scholars are influenced by and have influences upon both other interpreters and the times in which they live This set is ideal for any class on the history of biblical interpretation and for those who want a greater understanding of how the current field of biblical studies developed **Bibliotheca Britannica; Or a General Index to British and Foreign Literature. Chaucer's has remained controversial ever since Dr Rand Schmidt's book offers a detailed examination of the literary linguistic and codicological evidence linking the authorship of the Equatorie with Chaucer. She analyses and compares the manuscript with other specimens proposed as Chaucer's hand and evaluates the available methods of testing. The volume includes a new transcription of the Equatorie accompanied by a facsimile of the MS and a KWIC concordance to the text. Diplomatic transcriptions of three Middle English astronomical texts have also been included and are printed here for the first time.
