

USING A MANNEQUIN

A mannequin (also called a model or dummy, for figure or dress form) is an often articulated doll used for artistic, fashion, anatomical, medical, and other purposes in design or the sciences.

For artists, mannequins already handle some of the body's basic shapes, rounded, geometric shapes. They compare with basic anatomical forms of volume that artists are painting over mannequins in different poses and gestures. Drawing is, if you are willing to draw honestly, to see the subject as you is a mannequin in particular specific poses that you find particularly difficult.

Of course, mannequins are not actually rigid, so they are not a substitute for studying or learning the anatomy of the body and observing all of the figure (or character) before you make your figure study sketches.

PRACTICE DRAWING SHAPES

Commonly, shapes of all kinds can be used to construct almost any complex volume you want to draw. In other words, you may need to use circles, while geometric shapes will suffice in construction of the necessary object or object.

Building a drawing that is composed of geometric shapes will require that you start from general movement together. Working back and forth between a pencil and your knowledge of general anatomy. Once you have a good sense of the general shape, you can carefully draw the whole figure up together, adding later on more detailed work of the drawing, moving from one part to another, using something like a long line to work on.

DRAWING FEET

Using shapes to help you construct a drawing that is useful in representing the foot.

Ensure your sketch and drawing match in the use of the foot with a correct line.

DRAWING A HEAD STARTS WITH A CIRCLE, AN oval, AND A CROSS

They need to be positioned depending on where the person is looking. There is more on this in the section on head and head expression.

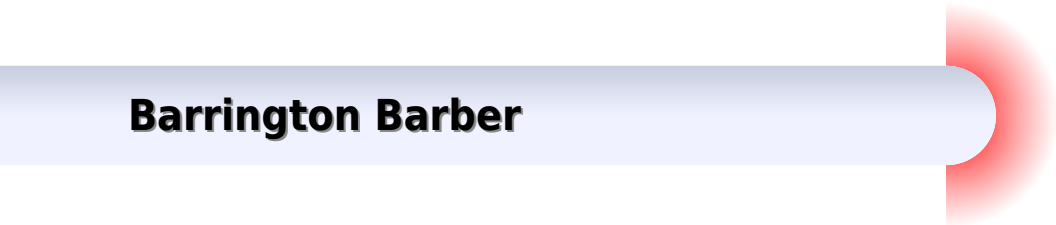

- The circle represents the skull when the face is forward.
- The oval is the front of the face (and jaw).
- The cross is the middle of the skull, and the front of the skull and the position of the face when the face is on.
- Another oval can be added to show the side of the head when the face is on.
