Shopkeepers and Master Artisans in Nineteenth-Century Europe Geoffrey Crossick, Heinz-Gerhard Haupt, 2016-07-01 First published in 1984 Shopkeepers and master artisans had a striking presence in the history of nineteenth century Europe not only in the development of industrial and urban economies but also the fabric of social life and the politics of protest The experience of 1848 the differing pace of various forms of nationalism and liberalism and at the end of the century the shift towards right wing nationalist or Catholic political movements reflected a developing crisis in the petite bourgeoisie The essays examine the nature of this crisis and ask critical questions about the social relations of the petite bourgeoisie with the developing working classes This book as a whole provides a fresh and integrated approach to the world of these shopkeepers and master artisans and illuminates much else besides in the social history of nineteenth century Europe **Europe Meets America** Gaia Caramellino, 2016-08-17 An analysis of the New York professional milieu between the Wall Street Crash of 1929 and the aftermath of WWII reveals an unexpected scenario in which diverse branches of technical culture and professional and institutional spheres often overlap and initiatives in the field of architecture are characterised by tensions between designers and technicians which pave the way for issues of architects autonomy responsibility and social roles in the New Deal From an initial portrayal of William Lescaze 1896 1969 as an unconventional figure straddling two continents this book challenges a long established interpretation that sees Lescaze exclusively as promoter of the International Style canons in the United States Moving beyond it this book focuses on the role that the Swiss architect played in defining the main features of New York social housing and in the evolution that marks the encounter between European modernity and an American federal scene still profoundly tied to local conventions From an initially difficult status as an migrant to his involvement in decisional processes and bureaucratic organisations Lescaze's professional progress coincides with the gradual acceptance of European forms and models which little by little became part of the institutional language related to public housing which would remain prevalent in New York City until the end of WWII Drawing from yet unpublished archival sources pertaining to two fields housing and architecture which have traditionally been separate in American historiography this book sheds light on many crucial issues in a branch of architecture that is
