Peterson,2012-12-06 In 1989 the federal government spent 1197 billion a mind boggling sum that is almost impossible to visualize Since there were 248 8 million people living in the United States in that year the government spent an average of 4811 for every man woman and child in the nation For a hypothetical family of four federal spending in 1989 amounted to an average of 19 244 To put this sum in perspective the money income of an American family averaged 35 270 in the same year To finance spending 1197

billion the government collected taxes from American citizens and residents in an amount of 1047 billion Because of a shortfall between what it spent and what it took in taxes the government had to borrow 150 billion partly from individuals but mostly from banks insurance companies and foreigners How where and on whom did the federal government spend all this money Since federal spending in 1989 totaled 23 cents in comparison to every dollar spent for the buying of goods and services finding an answer to this question is not a trivial matter Spending by Washington reaches into every nook and cranny of the economy touching the lives and fortunes of almost everyone in the nation Thus answers to these questions are of more than academic interest *American Government* Alan R. The Fight for Local Control Campbell F. Scribner, 2016-06-07 Throughout the twentieth century local control of school districts was one of the most contentious issues in American politics As state and federal regulation attempted to standardize public schools conservatives defended local prerogative as a bulwark of democratic values Yet their commitment to those values was shifting and selective In *The Fight for Local Control* Campbell F. Scribner demonstrates how in the decades after World War II suburban communities appropriated legacies of rural education to assert their political autonomy and in the process radically changed educational law Scribner's account unfolds on the metropolitan fringe where rapid suburbanization overlapped with the consolidation of thousands of small rural schools Rural residents initially clashed with their new neighbors but by the 1960s the groups had rallied to resist government oversight What began as residual

opposition to school consolidation would transform into campaigns against race based busing unionized teachers tax equalization and secular curriculum In case after case suburban conservatives carved out new rights for local autonomy stifling equal educational opportunity Yet Scribner also provides insight into why many conservatives have since abandoned localism for policies that stress school choice and federal accountability In the 1970s as new battles arose over unions textbooks and taxes districts on the rural suburban fringe became the first to assert individual choice in the form of school vouchers religious exemptions and a marketplace model of education At the same time they began to embrace tax limitation and standardized testing policies that checked educational bureaucracy but bypassed local school boards The effect Scribner concludes has been to reinforce inequalities between districts while weakening participatory government within them keeping the worst aspects of local control in place while forfeiting its virtues
