

The criteria for a Section 42 Safeguarding Enquiry under the Care Act 2014:

- The Care Act (Section 42) states that the Local Authority must initiate a safeguarding process for anyone who meets the following three criteria:
 - (a) has needs for care and support (whether or not the authority is meeting any of those needs),
 - (b) is experiencing, or is at risk of, abuse or neglect, and
 - (c) as a result of those needs is unable to protect himself or herself against the abuse or neglect or the risk of it.
- It is really important to consider part (c) carefully, and this is something you may want to discuss in a 'pre-referral consultation'.

Informing Energy and Climate Policies Using Energy Systems Models George Giannakidis, Maryse Labriet, Brian Ó Gallachóir, GianCarlo Tosato, 2015-04-06 This book highlights how energy system models are used to underpin and support energy and climate mitigation policy decisions at national multi country and global levels It brings together for the first time in one volume a range of methodological approaches and case studies of good modeling practice on a national and international scale from the IEA ETSAP energy technology initiative It provides insights for the reader into the rich and varied applications of energy system models and the underlying methodologies and policy questions they can address The book demonstrates how these models are used to answer complex policy questions including those relating to energy security climate change mitigation and the optimal allocation of energy resources It will appeal to energy engineers and technology specialists looking for a rationale for innovation in the field of energy technologies and insights into their evolving costs and benefits Energy economists will gain an understanding of the key future role of energy technologies and policy makers will learn how energy system modeling teams can provide unique perspectives on national energy and environment challenges The book is carefully structured into three parts which focus on i policy decisions that have been underpinned by energy system models ii specific aspects of supply and end use sector modeling including technology learning and behavior and iii how additional insights can be gained from linking energy system models with other models The chapters elucidate key methodological features backed up with concrete applications The book demonstrates the high degree of flexibility of the modeling tools used to represent extremely different energy systems from national to global levels **Futuring Design Education, Volume 1** Aneesha Sharma, Ravi Poovaiah, 2025-02-12 This book presents select proceedings of the two day conference titled Futuring Design Education FDE 2024 and it examines the transformation of design knowledge the evolving spaces of learning and the ecosystems of teaching and learning The topics covered include the pedagogical model of design education the experiments and technological advances that impact design education The book also discusses the roles and challenges of learning spaces remote learning in digital spaces and synchronous and asynchronous learning tools The book will also look at the social contexts in design pedagogy cultural affiliations and alignments and will allude to any new learning frameworks for design education The book can be a valuable reference for design educators design researchers and professionals interested in design education **EXAMPLER NORCET 2021 - PART 1** Akash Tiwari, 2021-04-10 Books prepared as per NORCET AIIMS RRB ESIC DSSSB JIPMER PGIMER GMERS COH GUJARAT etc 9999 Practice MCQs with without Rationals FAQs IMP Topics are Covered Highly Successful Team Chosen Contents Also Available in English Gujarati Hindi *Color Language and Color Categorization* Jonathan Brindle, Geda Paulsen, Mari Uusküla, 2016-08-17 This volume represents a unique collection of chapters on the way in which color is categorized and named in a number of languages Although color research has been a topic of focus for researchers for decades the contributions here show that many aspects

of color language and categorization are as yet unexplored and that current theories and methodologies which investigate color language are still evolving Some core questions addressed here include How is color conceptualized through language What kind of linguistic tools do languages use to describe color Which factors tend to bias color language What methodologies could be used to understand human color categorization and language better How do color vocabularies evolve How does context impact the color cognition The chapters collected here adopt different theoretical and methodological approaches in describing new empirical research on how the concept of color is represented in a variety of different languages Researchers in linguistics psychology and cognitive science present a set of new explorations and challenges in the area of color language The book promotes several methodological and disciplinary dimensions to color studies The color category is given an in depth and broad based examination so a reader interested in color conceptualization for itself will be able to form a solid vision of the subject Exclusive Use in an Inclusive Environment Philip De

Man,2016-07-25 This book aims to find a workable interpretation of the non appropriation principle that is compatible with both the existing international space law framework and the move of the private space industry towards the mining of asteroids and other celestial bodies It does so by analysing the rules on the use of orbits as limited natural resources as a concrete indication of how space resources can be exploited by one user while respecting the non appropriation principle and the interests of other users in space This analysis is complemented by a thorough review of the meaning of property rights in the context of the existing international space law regime This allows the author to distinguish between the lawful exploitation and unlawful appropriation of resources in a manner that could pave the way for a workable asteroid mining regime that takes into account the needs of individual companies and the international community Exclusive use in an inclusive environment frames the legal regime of the exploitation of natural resources in outer space as the most pressing example to date of the tension that arises between the rights of a single spacefaring actor and the interests of the broader international community Though academic in its approach in dealing with one of the most fundamental issues of space law to date the book has very practical ambitions By offering a pragmatic interpretation of the space law principles that are likely to remain the legal foundations of asteroid mining for the foreseeable future Exclusive use in an inclusive environment hopes to inform academics practitioners and policymakers alike in their future attempts at working out a fair equitable and effective management regime for the exploitation of natural resources in outer space **Unmanned Aircraft Systems** Ella

Atkins,Anibal Ollero,Antonios Tsourdos,2017-01-17 UNMANNED AIRCRAFT SYSTEMS UNMANNED AIRCRAFT SYSTEMS An unmanned aircraft system UAS sometimes called a drone is an aircraft without a human pilot on board instead the UAS can be controlled by an operator station on the ground or may be autonomous in operation UAS are capable of addressing a broad range of applications in diverse complex environments Traditionally employed in mainly military applications recent regulatory changes around the world are leading to an explosion of interest and wide ranging new applications for UAS in

civil airspace Covering the design development operation and mission profiles of unmanned aircraft systems this single comprehensive volume forms a complete stand alone reference on the topic The volume integrates with the online Wiley Encyclopedia of Aerospace Engineering providing many new and updated articles for existing subscribers to that work The chapters cover the following items Airframe configurations and design launch systems power generation propulsion Operations missions integration issues and airspace access Coordination multivehicle cooperation and human oversight With contributions from leading experts this volume is intended to be a valuable addition and a useful resource for aerospace manufacturers and suppliers governmental and industrial aerospace research establishments airline and aviation industries university engineering and science departments and industry analysts consultants and researchers Strangers Within Francisco Bethencourt, 2024-03-26 The New Christians largely former Jews and Muslims who were forced to convert to Christianity in the 16th and 17th centuries were both a persecuted group as well as an international elite and their story argues Francisco Bethencourt offers a fascinating and indispensable view into the period and the making of a global economy In what is intended to be an authoritative and innovative book the author will recount how the New Christians were a major force in structuring the Atlantic economy and reconstruct their involvement in trading system which ran from the Atlantic to the Indian Ocean Their hybrid religious allegiances situated as they were primarily between Judaism and Christianity provide a unique case of cosmopolitanism in various parts of the world New Christian business practices forms of organisation and codes of behaviour linked intercontinental networks to local agencies Their ability to resist religious persecution implied alliances at the highest levels of the Catholic Church and the Iberian monarchies This book will provide entirely new perspectives for our understanding of cosmopolitanism religious allegiances political alliances and business history The New Christian trading elite has been studied in a fragmentary way compartmentalised in time and space but it has never been the subject of comprehensive research over the long term from the forced conversion of the Jews in Portugal in 1497 to the abolition of the distinction between New Christians and Old Christians in Portugal in 1773 spanning connections between Europe Africa Asia and the New World *Analysis, Design and Evaluation of Man-Machine Systems* 1989 B.
