 McInerney, Gregory Arief D. Liem, Gavin T. L. Brown, 2009-12-01 Assessment for learning is meant to engage motivate and
 enable students to do better in their learning However how students themselves perceive assessments both high stakes
 qualifications and low stakes monitoring is not well understood This volume collects research studies from Europe North and
 South America Asia and New Zealand that have deliberately focused on how students in primary secondary and tertiary
 education conceive of experience understand and evaluate assessments Assessment for learning has assumed that formative
 assessments and classroom practices would be an unqualified success in terms of student learning outcomes Making use of a
 variety of qualitatively interpreted focus groups observations and interviews and factor analytic survey methods the studies
 collected in this volume raise doubts as to the validity of this formulation We commend this volume to readers hoping to
 stimulate their own thinking and research in the area of student assessment We believe the chapters will challenge
 researchers policy makers teacher educators and instructors as to how assessment for learning can be implemented
