However, there are no consensus guidelines on evidence-based decision making. This book provides a framework for evidence-based decision making both in RTT and RTP following lower limb muscle injuries sustained in football. Based on the Italian Consensus Conference 2019 on return to play after lower limb muscle injury in football, it provides a list of RTT and RTP criteria after such injuries compiled by orthopedic surgeons, sports physicians, radiologists, rehabilitation physicians, sport physiologists, general surgeons, family physicians, physiotherapists, physical trainers, and psychologists working in elite football in Italy. The book identifies the main criteria for RTT and RTP following injuries involving the most important muscle groups: i.e. quadriceps, hamstring, hip adductor, hip external rotator, iliopsoas, and soleus/gastrocnemius.
