

Anatomy and Physiology - midterm 1

anatomy	the structure of body parts and their relationship to one another which is concrete
physiology	the functions of the body - how the body parts work and carry out their life sustaining functions
scientific reductionism	psychological theory focused on reducing complex phenomena into their most basic parts
principle of complementary of structure and function	something is inseparable because function always reflects structure - you can infer function from structure
structural organization of the human body	it ranges from atoms to the entire organism
six types of cells	cells that connect body parts, form linings, or transport gases, cells that move organs and body parts, cells that store nutrients, cells that fight disease, cells that gather information and controls body function, cells of reproduction
what cells connect body parts, form lining, or transport gases	epithelial cells, fibroblast, erythrocytes
what cells move organs and body parts	skeletal muscle cells, smooth muscle cells
what cells store nutrients	fat cells
what cells fight disease	macrophage cells
what cells gather information and control body functions	nerve cells
what cells are in charge of reproduction	sperm cells
