

Characteristics of Linear Functions

Linear Functions

Linear Functions:

$$y = mx + b$$

Slope:

Intercept (y-axis):

Range:

Domain (x-axis):

Table

x	y
-2	0
-1	1
0	2
1	3
2	4
3	5
4	6

- What pattern do you observe in the table and graph of the linear function? (The points form a straight line, and the slope is constant. The x-intercept is -2, and the y-intercept is 2.)

Characteristics of Linear Functions

Characteristics of linear functions (slope, intercept, and range) have been addressed in previous math courses.

Characteristics of Linear Functions:

Slope:

Slope (m) is the change in y over the change in x.

Intercept (y-axis):

Intercept (b) is the value of y when x = 0.

Range (x-axis):

Range (y-axis) is the set of all possible y-values.

Slope-Intercept Form:

The slope-intercept form, $y = mx + b$, is used to graph a line. The slope (m) and the y-intercept (b) are used to graph the line.

Changes in the slope (m)

- If $m > 0$, the line is increasing (positive slope).
- If $m < 0$, the line is decreasing (negative slope).
- If $m = 0$, the line is horizontal (zero slope).
- If m is a fraction, the line is increasing or decreasing (positive or negative slope).
- If m is a decimal, the line is increasing or decreasing (positive or negative slope).

Changes in the intercept (b)

- If $b > 0$, the line is above the x-axis (positive y-intercept).
- If $b < 0$, the line is below the x-axis (negative y-intercept).
- If $b = 0$, the line passes through the origin (zero y-intercept).

Changes in the range (y)

- If $y > 0$, the line is above the x-axis (positive y-intercept).
- If $y < 0$, the line is below the x-axis (negative y-intercept).
- If $y = 0$, the line passes through the origin (zero y-intercept).

Beckmann, Denisse R. Thompson, Rheta N. Rubenstein, 2009-11-02 Too many high school students faced with mathematics in courses at the level of algebra and beyond find themselves struggling with abstract concepts and unwilling to pursue further study of mathematics When students curtail their course taking in mathematics they may be impacting their college and career options Thus high school mathematics teachers have the responsibility to help students recognize the value and importance of mathematics while also designing instruction that makes mathematics accessible to all students Ball and Bass 2000 as well as other mathematics educators have recognized that mathematics teachers not only need to know mathematics content and mathematics pedagogy i e teaching strategies but they also need to know how these ideas are integrated This mathematical knowledge for teaching is the knowledge that teachers of mathematics need and it differs from the knowledge that research or applied mathematicians must know This text is designed to provide teachers with insights into this mathematical knowledge for teaching Teaching and Learning High School Mathematics is likely different from many other texts that you have used It integrates both content and pedagogy to help you develop and build your own understanding of teaching The text is designed to help you develop deep conceptual understanding of fundamental mathematics Ma 1999 so that you are able to approach mathematics from multiple perspectives with many tools Such flexibility in teaching is essential if teachers are to help all students become mathematically proficient Throughout this book you are encouraged to work in cooperative teams This strategy is designed to help you develop a mathematics learning community and build a professional network that will be a valuable resource during your professional career Hopefully you will experience the benefits of engaging in rich mathematical discussions with peers and consider how to encourage such learning environments in your own classrooms Lesson planning is another element pervasive throughout this text To help teachers plan for effective student centered lessons the Question Response Support QRS Guide is introduced in Lesson 1 1 and used throughout the remainder of the lessons The QRS Guide is a tool on which teachers may record tasks or questions Q for students expected and observed student responses R and teacher support S in the form of additional just enough questions to support students in their progress on the task In each unit teachers expand their repertoire of teaching and learning elements and strategies and incorporate these elements as they plan additional lesson segments In Unit 4 lesson planning is formally introduced as teachers put together elements from previous units into complete cohesive lesson plans *Research in Education* ,1973 *Index to Educational Audio Tapes* National Information Center for Educational Media,1974 *Index to Educational Audio Tapes* ,1974 **Everyday Mathematics: Teacher's lesson guide v. 1] [v.3] Teacher's lesson guide v. 2** ,2004 **Moving Through Dimensions** Clg Of William And

Mary/Ctr Gift Ed,2021-09-03 Moving Through Dimensions approaches spatial reasoning through one dimensional two dimensional and three dimensional tasks designed for students in the middle school grades The unit also asks students to explore the transition between dimensions and representations of three dimensional objects in two dimensions This book includes pre and postassessments multiple reproducible materials and lessons based on NCTM standards Moving Through Dimensions was developed by the Center for Gifted Education at The College of William and Mary to offer advanced curriculum supported by years of research The Center s materials have received national recognition from the United States Department of Education and the National Association for Gifted Children and they are widely used both nationally and internationally Each of the books in this series offers curriculum that focuses on advanced content and higher level processes The science units contain simulations of real world problems and students experience the work of real science by using data handling skills analyzing information and evaluating results The mathematics units provide sophisticated ideas and concepts challenging extensions higher order thinking skills and opportunities for student exploration based on interest These materials are a must for any teacher seeking to challenge and engage learners and increase achievement Grades 6 8
