A Political Economy of Arab Education Mohamed Alaa Abdel-Moneim,2015-09-07 The failure of reform policies in areas of critical importance to Arab populations such as health and education played a central role in igniting the Arab Awakening yet this policy perspective has been largely absent from recent studies of the region Arab regimes most reliant on repression to guarantee their survival were also those most vulnerable to mass politics Where threats to regime survival have been limited so have more meaningful reforms been possible finding an alternative to political change through focusing on soft policy areas such as education A Political Economy of Arab Education offers a comprehensive analysis of K 12 education systems in Arab countries deepening understanding of their administrative structures and outcomes and exploring how political considerations have impacted the ability of Arab regimes to engage in meaningful reform Taking a unique comparative political economy perspective it examines the reasons behind policy stagnation in Arab countries addressing the effects of size history and political stability on the design and implementation of policies and administrative structures Its informed analysis and comparison of education systems provides new insight into Arab regimes and highlights factors pulling them towards either stagnation or reform Examining the sustainability of reforms and establishing the benefits of engaging

in meaningful change this book sheds light on why some regimes survived the Arab Spring while others crumbled and formulates convincing predictions on the potential for future regime change in the region This book will be of key interest to students and scholars of Middle Eastern Studies International and Comparative Education and Development Studies

Technology's Edge Lisa Barrow, Lisa Markman, Cecilia Elena Rouse, 2008 We present results from a randomized study of a well defined use of computers in schools a popular instructional computer program for pre algebra and algebra We assess the program using a test designed to target pre algebra and algebra skills Students randomly assigned to computer aided instruction score 0.17 of a standard deviation higher on pre algebra algebra tests than students randomly assigned to traditional instruction We hypothesize that the effectiveness arises from increased individualized instruction as the effects appear larger for students in larger classes and in classes with high student absentee rates *InfoWorld*, 1987-08-17 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects
