

### 3. Marking points

#### 3.1 Marking of lists

This applies to questions requiring a set number of responses, but for which students have provided extra responses. The general principle to be followed in such a situation is that 'right + wrong = wrong'.

Each error / contradiction negates each correct response. So, if the number of error / contradictions equals or exceeds the number of marks available for the question, no marks can be awarded.

However, responses considered to be neutral (indicated as \* in example 1) are not penalised.

Example 1: What is the pH of an acidic solution?

[1 mark]

| Student | Response | Marks awarded |
|---------|----------|---------------|
| 1       | green, 5 | 0             |
| 2       | red*, 5  | 1             |
| 3       | red*, 8  | 0             |

Example 2: Name two planets in the solar system.

[2 marks]

| Student | Response                                                      | Marks awarded |
|---------|---------------------------------------------------------------|---------------|
| 1       | Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, Neptune | 0             |

#### 3.2 Marking of extended responses (essays)

For questions requiring an extended response, the whole response of a candidate is marked. The whole of the given answer is marked and not just the correct parts. If the number of the question is not given, the whole of the response is marked.

#### 3.3 Marking procedures for calculations

Marking should be awarded for each stage of the calculation completed correctly. An incorrectly calculated answer does not mean that the whole of the calculation is marked as incorrect. The given answer is marked as correct, without any working shown.

#### 3.4 Interpretation of 10

Answers using the word 10 should be given credit only if it is clear that the 10 refers to the correct subject.
