Computer Simulation Studies in Condensed-Matter Physics X David P. Landau, Kin-Keung Mon, Heinz-Bernd Schüttler, 2012-12-06 Computer Simulation Studies in Condensed Matter Physics X is devoted to Prof Masuo Suzuki's ideas which have made novel new simulations possible These proceedings of the 1997 workshop comprise three parts that deal with new algorithms methods of analysis and conceptual developments The first part contains invited papers that deal with simulational studies of classical systems The second of the proceedings is devoted to invited papers on quantum systems including new results for strongly correlated electron and quantum spin models The final part contains a large number of contributed presentations Decision Making under Uncertainty Kerstin Preuschoff, Peter N. C. Mohr, Ming Hsu, 2015-06-16 Most decisions in life are based on incomplete information and have uncertain consequences To successfully cope with real life situations the nervous system has to estimate represent and eventually resolve uncertainty at various levels A common tradeoff in such decisions involves those between the magnitude of the expected rewards and the uncertainty of obtaining the rewards For instance a decision maker may choose to forgo the high expected rewards of investing in the stock market and settle instead for the lower expected reward and much less uncertainty of a savings account Little is known about how different forms of uncertainty such as risk or ambiguity are processed and learned about and how they are integrated with

expected rewards and individual preferences throughout the decision making process With this Research Topic we aim to provide a deeper and more detailed understanding of the processes behind decision making under uncertainty

The World After Cheap Oil Rauli Partanen, Harri Paloheimo, Heikki Waris, 2014-10-24 Substantial evidence suggests that we are currently living at the peak of oil production with few prospects for cheap oil ever returning Yet the media politicians and regular people have hardly started to talk about what this means Oil literally runs our societies from transportation to food production to economic activity Without oil everything stops There are powerful arguments that if we fail to increase oil production we will also fail to grow our economy as a whole For oil importing western nations the news is bleak higher oil prices seem to put a glass ceiling on their economic growth making current debt problems worse no matter what monetary and economic policies we might choose The World After Cheap Oil offers a thorough package of information about oil its uses and its role in our society's important sectors It presents the most prominent substitutes and alternatives and their limits and promises It also delves deep into the many risks problems and mechanisms that can make the world after cheap oil a much more unstable place for nations and humanity as a whole The book also explains why there has been so little public debate on the subject and what the future might look like after oil production starts its final terminal decline

Online Learning and Community Cohesion Roger Austin, Bill Hunter, 2013-07-04 National governments and multi national institutions are spending unprecedented amounts of money on ICT on improving the overall quality of school learning and schools are increasingly expected to prepare young people for a global economy in which inter cultural understanding will be a priority This book explores and analyzes the ways ICT has been used to promote citizenship and community cohesion in projects that link together schools in different parts of the world It examines the theoretical framework behind such work and shows the impact of initiatives in the Middle East Canada the USA England Northern Ireland the Republic of Ireland and elsewhere in the European Union This is a critical examination of the technologies that have been deployed the professional development that has been provided and an evaluation of what constitutes good practice particularly in terms of what collaborative learning really means for young people Many of these initiatives have enabled young people to develop more positive relations with culturally and religiously different neighbours but this work has just begun Continuing international tensions over matters of identity and faith require that we better understand the political context for such work so that we might shape future directions more deliberately and more clearly

Diagnostics for Experimental Thermonuclear Fusion Reactors 2 Peter E. Stott, Giuseppe Gorini, Paolo Prandoni, 2012-12-06 This book of proceedings collects the papers presented at the workshop on Diagnostics for Experimental Fusion Reactors held at Villa Monastero Varenna Italy September 4 12 1997 This workshop was the seventh organized by the International School of Plasma Physics Piero Caldirola on the topic of plasma diagnostics and the second

devoted to the diagnostic studies for the International Thermonuclear Experimental Reactor ITER The proceedings of the first workshop on ITER diagnostics were published by Plenum Press in 1996 with the title Diagnostics for Experimental Thermonuclear Fusion Reactors While many of the ideas and studies reported in the first workshop remain valid there has been substantial progress in the design and specification of many diagnostics for ITER This motivated a second workshop on this topic and the publication of a new book of proceedings ITER is a joint venture between Europe Japan Russia and USA in the field of controlled thermonuclear fusion research The present aim of ITER is to design an experimental fusion reactor that can demonstrate ignition and sustained burn in a magnetically confined plasma To achieve this goal a wide range of plasma parameters will have to be measured reliably It is also anticipated that diagnostics will be used much more extensively as input to control systems on ITER than on present fusion devices and this will require increased reliability and long term stability

Aqa P3 June 2012 Paper: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the fascinating narratives that have captivated audiences this year. Aqa P3 June 2012 Paper : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Aqa P3 June 2012 Paper : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens' "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and thrilling novel that will keep you guessing until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
