book addresses all aspects of the topic including What are appropriate expectations for research in the first two years How to design appropriate course based research for first and second year students How to mentor a class rather than individual students How students can disseminate the results of their research Possible citizen science projects appropriate for the first and second years Providing additional resources available to support course based research in the first two years Designed for faculty at four year and two year colleges and including examples from the sciences the social sciences and the humanities the strategies and methods described can be adapted to disciplines not specifically mentioned in the book Many faculty are hesitant to engage first and second year students in undergraduate research because they worry students don't know enough to conduct authentic research in their discipline because they worry about the time it will take to develop activities for these students and because they wonder how they can mentor a whole class of students doing research The authors have successfully dealt with these issues and provide examples of how it's done
