Intelligent Business Analytics Nitendra Kumar,Lakhwinder Kaur Dhillon,Mridul Dharwal,Elena Korchagina,Vishal Jain,2025-08-27 This book explores the transformative role of soft computing methods in increasing business analytics providing a comprehensive look into how these advanced methods can be applied to complex business data for meaningful insights Through the integration of neural network fuzzy logic genetic algorithms artificial intelligence machine learning deep learning and other innovative approaches Intelligent Business Analytics Harnessing the Power of Soft Computing for Data Driven Insights presents a roadmap for leveraging computational intelligence in diverse areas of business decision making Readers will venture from predictive analytics and customer segmentation to real time decision support systems and many other applications Soft computing s flexibility and applicability in the handling of uncertainty ambiguity and dynamic data environments shine throughout the book Each chapter is created to be a base of theory and at the same time provide an applied example so the book is appropriate for students researchers and professionals in the field This book also discusses where the markets are heading and new applications that are in store for intelligent analytics to create a competitive advantage that also supports sustainable growth At the end this book is for those who want to learn more about using data driven approaches and those who are ready to face the changes of the fast evolving digital world

Bioinformatics in the Post-genomic Era Ivan Y. Torshin,2006 Biomedicine is one of the most important fields for the prospective applications of the information from human genome studies However there are many white spots in the present day understanding of the biomedical implications of this information Given that at least half of the proteins in the established sequence of the human genome have no annotation whatsoever and that the sequence similarity searches are not likely to produce any definite research strategies to analyse the functions of these unknown proteins as well as other enigmatic aspects of the human genome are being elaborated The elaboration of the logistics of these research strategies of the relevant computational methodologies as well as the general management of the informational complexity of the biological systems belong to the main tasks for the post genomic bioinformatics This volume concentrates on the role of the biophysical studies and biophysical concepts that can assist the endeavour
